Sad Figures

Already They Contrast With Losses in World War I

If anything were needed to drive some to this country the cold, shock-ing realization that it is immersed in he barbarism that is war, it should be upplied by the release Saturday of-the lavy's summary of casualties for the rest four months of war, the release y the Navy of the names which stand or the personalities extinguished in the early stages of the war, and the rmy's release of a first and prelimin-ry casualty list of the Philippines.

rmy's release of a first and preliming casually list of the Philippines.

Aiready casualities in this war exceed two respects canualities for the whole interen months of World War I. In at earlier struggle Navy losses at sea killed, died of wounds or missing are a total of 77 officers and 724 men. dead alone, only partily explained by were losses at Pearl Harbor, the Navy its for the first four months of this rearly 3,000 individuals. The numror missing mainly attributed to assirous actions in the Battle for way is 2,405; and none of the figures of life among merchant seamen. The other respect in which casualities war II already exceed those of a silar category for the whole of War is the depressing one of prisoners. The my has not yet made public a sumury of losses on Batsan, but it is a tainly that most of the 35,000 troops rew whee Batsan fell, about a fifth of some were continental Americans, the st U. S. Fillipinos, were taken prisoner the Japs. The comparable figure for in that other war—4,500.

Also in Charlotte, N. C., a house caught on fire. The alarm was turned in, but when the firemen got there the man of the house fought tooth and toernall to keep them from fighting the flames. Evidently his maxim was that once you had a good fire going, why put it out?

In Washington, D. C. the War Production Board gathered together in full solemnity and issued an order that ice cream makers would have to limit themselves to twenty flavors. All over the land an anguished cry arose—Oh, Mr. Nelson, take away our chocolate and vanilla, if you must, our peach, strawberry and raspberry lee; but oh, Mr. Nelson, bease, sir, don't take away our tutti frutti! Not that!

The Silly Season, made a little grimmer by the intrusion of war notes, moved on. Where it would break out somewhere was sure.

On The Fence

Mr. Daniels and Sgt. Scott Will Have To Argue This Out

There is nothing Josephus Daniels likes better than to go rip-snorting into something he doesn't like. And so when he suddenly took it into his head that it was undemocratic for Army nurses (who are commissioned officers) not to be allowed to have dates with enlisted men, be sat down and wrote himself a place and said that this "rotten tradi-tion stinks." And what was more,

"The bunk that such anobbery promotes discipline is absurd. Off duty, men are equals. On duty, the orders of ranking officers must be obeyed, and all privates are glad to render such obedience. They resent—and so does consider the order such control of the order than the same called two-ritten law of denial of fundamental rights."

mental rights.

Mr. Daniels tirade, delivered with the accumulated vigor of his 80 crusading years, attikes us as somewhat on the order of all the worrying the country went through a few months ago over the soldier boys' morale. The poor soldier boys, people would say; their morale is so low—(as though they needed a pill or something). And all the time the soldier boys went quietly on doing what they had to do and letting their morale take care of itself until the people started worrying about something else. So in the no-dates-with-nurses-for-nilsted-men case. That is, who's kicking? The nurses? The enlisted men? What we suspect has happened is that Mr. Daniels went to see that movie. "To the Shores of Tripoli," and had his notions of democratic behavior offended when a Marine sergeant lold off a fresh private for pestering a nurse—and, boy, was she good looking! The Marine sergeant, by the way, was Randolph Scott, and old Charlotte boy, and while the rest of the Marine Corps may be hotty resentful of this no-date tradition. Randolph seemed to think it was a pretty good died.

Under the circumstances, being torn between respect for Mr. Daniels' views and Randolph's feeling about 11, probably the wisest thing for us to do is to

General Stilwell got all the support that was available. The available support considered inspety of morale from the Chinese. The Generalisation and Mme. China [Kal-She kand General Stilwell piled into an airplane and flew to Lashio and from there went on down to the front to raily, the Chinese forces against the next Japanese attack.

All three of them knew how much depended on it. All three knew the hard facts. They knew that the American Volunteer Group, for all its brilliant success, had been whittled down until it could do no more than harass the Japanese, who had real control of the air. They knew Lashio had already been bombed and was coming fast into the line of fire and that the huge air-field then being made still larger, was practically helpless to defend itself. On the most recent Japanese raid the bombs were dropping before the alarm sounded. The airfield was not hit that time but the Japanese came within a few hundred yards of it. I stood on the airfield on Easter Studya and saw the situation first hand Jt was easy to believe then what I was told about the situation first hand It was believe then what I was told about the prospects.
