#### Rack To Church

Americans Turn To God In Great Numbers in War

Slace 1941, American churches have made their largest gains in memberatip in sill history. A gain of almost 200,000 members is recorded by The exhibited of American Churches, an ausorilative Journal. Well over 76 millows Americans are now church members, more than half the total popularing of the nation. In the times of cases, the church in America, as in the state of the more than half the signal of the same of the same of the nation. is seldom considered by laymen to involve religion in any of its forms, we think it well that this great growth of the American, church be noted, and that its marshaled strength be viewed at its very peak. The war has brought the American people back to God and his Church; before the war came, there was a drifting away, a decline of membership.

a drifting away, a decline of membership.

Today there are 30,502,067 American Protestants, 22,955,247 Catholics, and 4,541,183 Jews, all belonging to institutions of faith as free as any ever known to mankind. It will be one of America's most ascred tasks, when the war is over, to see that this national interest in the Church is continued, and is not allowed to lag, as it was in the early Twenties. America's churchmen have, in the years a head, the glowing opportunity of a generation.

#### Second Front

Russians Now Are Saving They're Giving Us Relief

They're Giving Us Rettey

If there are any backward-looking
souls among us who would like to remember the war of the 1940's as a time
when the fighting Red Army of Soviet
Russia was pleading for a second front,
they'd better look quick, and remember
with all their might. For the Russians
have completely changed tune. Where
once they begged for help from a second front, a European diversion, they
now send out proud communiques, telling how their own offensive is helping
the British-American armies in Sicily.

This is a strange nittle for the Rus-

now sens our prous communiques, telling how their own offensive is helping the British-American armies in Sicily. This is a strange pitch for the Russian tune. For a long while they yelped for a second front, and when North 'Africa came they considered that a token of help, but not a real front. And when Sicily came that, too, was spurned. Such an action was a preliminary, to be sure, but was not a second front. The Russian praise was limited.

Now, of a sudden, there is the claim that the Red destruction of thousands of German weapons and men on the Ord front is not only crushing the Nazl advance, but is also lending great assistance to the boys in Sicily. We not only do not believe the claim such a subject of the control of the control of the sold of the control of the claim such as the control of the sold of the control of the sold and ungrateful ealm with which they have accepted British-American weapons, and declined assistance in command. What we do not intend to abide is the cry that, whatever made possible by Russian arms. We were made possible by Russian arms, we have long pald tribute to the Russian power of resistance, and realize that without this, the war might long since have been lost. But Russia, too, without us, would have been lost. But Russia, too, without us, would have been lost. But Russia, too, without us, would have been lost. But Russia, too, without us, would have been lost, But Russia, too, without us, would have been lost, But Russia, too, without us, would have been lost, But Russia, too, without us, would have been lost, But Russia, too, without was also pens a second front herself, in the us, would have been lost. How long can it be before we cry, ourselves, that Russia open a second front herself, in the East?

War Costs Mount Terribly, But Casualties Are Low

War Costs Mount Terribly,

But Casualties Are Low

There is little basis for comparison between the first and second phases of the World War, but the installment fought in 1914-18 so often comes up for matching with operations of these times that such comparisons have become habitual. For the purposes of the latest summary, periods of identical length are being used. In the last war the U.S. fought 584 days. In this war the 584th day passed on July 12. For those periods, some figures:

Last war, 4300,000 and on July 12. For those periods, some figures:
