Statesmanship In Labor Relations

THERE will be afrikes in the months ahead, of course, and some of them will probably be made and some of them will probably be made about the months are also as a superior of the months of the same and the same an

The union settled for a wage increase that will average about 15 cents an hour, bringing minimum wages in the steel industry above the forty dollar a week level. Phil Murray might have argued, with complete justice, that so moderate an increase is marificated to the condition of the condition of the condition of the cared to, that his union members have made a personal scartified in the interests of stable labor relations and continued high production.

The company, on the other hand, can en-ter a similar claim on its own behalf. United States Steel will. President Fairless aid, meet the increased labor costs pro-vided by the new contract without raking the price of steel, which means it is volun-tarily reducing profits If the spiral is thus

be profound.

It is clear that both company and union recognized a joint responsibility higher than the obligation to increase the earnings of workers or stockholders. They bargained within the limits set by present

ings of workers or stockholdera. They bargained within the limits set by present profit margins, both parties accepting the fact that the final settlement much not be predicated upon a further increase in steel prices. The result is the most important frontal attack yet launched on the problems of inflation good news to every citizen now struggling to stretch his, income to meet his expenses upon the electric bargain-ling, also has another and perhaps a deeper significance. Those gentlemen in Washington who are now busily putting together restrictive labor legication might take note of the fact that statesmanship is not now impossible in labor-management relations. They might wonder if a long with the closed shop, the jurisdictional strike, etc., they are likely to outlaw also the possibility of reasonable labor-management settlements worked out in private by reasonable men.

The Extension Of City Limits

A ROUND City Hall they now refer to next Monday's vote on City extension as the forgotten election. The school tax vote, the multicipal primaries, the coming ABC election—all these controversial contests have served to obscure a referendum in which no organized factions have emerged.

emerged.

All of this means, we suppose, that extension of the City limits will be approved by a rather large majority. Every citizen of Charlotte is entitled to vote on the question and few if any of these have any rea-Charlotte is entitled to vote on the question and few if any of these have any reason for voting against it. Such opposition

the state of the committee of the commit

decided that her limits must be ex-ded. The election is a necessary part of

the process of orderly growth.

The communities that now ring the City are not independent under any definition. They are linked to Charlotte by water pipes, sever mains, telenhone lines, and electig, wires, and tney are also linked by the equality binding ties of common interest. Yet, until: they are formally incorporated in the City, Charlotte has no control over them. They may grow as they see file—build narrow streets, merge industrial and residential sections, violate proper standards of nealth and sanitation. proper standards of nealth and sanitation.
Eventually they must come into the City and for obvious reasons it is wise to bring them in while they are still in their forma-

them in while they are still in their formative stages.

It is unfortunate that most of the sections incorporated by the present extension are already largely built-up. The City will gain precious little elbow room in the process, and if the present set of growth is sustained will face the same problem gain sustained will face the same problem again.

At any rate, the present election is timely, and we hope our confidence in its out-come is justified. It would be tragic lift through negligence or lack of interest a sufficient number of City residents failed to go to the poils on Monday and, mark the

The World's Deep-Freeze Locker

The World's Deep-Fr

T anybody is éntitled to talk like a SunI day supplement writer, it is Admiral
Byrd. For many years the Admiral Byrd. For many years the Admiral Byrd. To many years the Admiral Bay been
setting foot where no man ever trod before and, except for a little minor criticism
for his habit of naming mountain ranges
atter his wife's relatives, the Admiral's
regulation as an explorer is unsulfied.
It is of some interest, therefore, the the
I is of some interest, therefore, the the
greation for future use of his private domain
at the South Pole. The place, he says,
would make a wonderful deep-freeze unit,
functioning with no operating overhead at
all. Fresh fruit left behind by the Byrd expedition 15 years ago came out of the lee
with its flavor and untritive value intact.
Any sort of foodstuff can be preserved indefinitely, it seems, by simply setting it
ashore in Little America.

This has led the Admiral to the conclusion
that the south noiar wastes offer a solution to the problem of feeding the world.
In years of piently, he suggests, surplus
foodstuffs should transported to the
new the problem of protecting markets without
actually destroying anything edible after
the New Deal manner. In years of famine,
such as this one, it would then be quite
a simple-manter to go to nature's deepfreese locker and take out enough to care
for the starving.

The plan is as admirable as it is simple. But there arise the usual problems of method, Private enterprise might take on the task of purchasing and storing food-stuffs in Little America but it would expect, reasonably enough, to make a profit on their ultimate resale. The starring, unhappily, are rarely able to pay their grocery bills.

This means then that some governmental organization would have to take over the deep-freeze approach to famine. Prightening words spring automatically in mind—collectivals, bureaureaxy, medding, planning, do-good, waste, extravagance, it components that the control of the proposers of the community—could possibly handle the task even if the practitioners of either were willing to let their competitors try.

However, it is well for men like Admiral However, it is well for men like Admiral

either were willing to let their competitors try.

However, it is well for men like Admiral Byrd to remind us of nature's potentials from time to time. They also remind us of the good life we mignt create on this planet if we could solve certain basic problems of human relationship. In the meantime it is nice to know, that facilities for feeding every human being on earth are at hand in case we ever arrive at a time when we are willing to work as had a treserving the human race as we are at destroying it.

Drew Pearson's : Ed Flynn Urges Liberalism On Truman Merry-Go-Round

PRESIDENT TRUMAN heard some blunt talk about "lib-eralism" from an unexpected quarter the other day. The man who preached the sermon on liberalism was none other than Ed Flynn, "Boos of the Brourt" and the man who did the most, next to Bob Hannegan, to nominate Truman at Chiefgo.

Note-Next day, the House passed the tough GOP anti-labor bill with 93 Democrats voting with the Republicans. Hague Speaks

Hague Speaks
