STORMS HOWL AT LOCALS U. S. Makes Conciliatory Gesture Toward Russians

"MECHANICAL BRAIN" PILOTS PLANE—This Army Air Force Douglas C-54 Skymaster (top) flew 2,400 miles across the Atlantic Ocean from Stephenville, Newfoundland, to Brise Norton, 40 miles west of London, England, entirely under control of a "mechanical brain" automatic pilot. An emergency crew of nine men was aboard, but all controls were operated by mechanism unaided by human hands throughout the flight.

Votes With Soviet On One Issue

Trusteeship Debate Blocked The United States joined Russia against Britain today in a successful Soviet move to block immediate debate on the report of the United Nations Trusteeship Council.

The U. S. move was interpreted as a conciliatory gesture following yesterday's appeal by Secretary-General A. R. Haldane for co-operation.

With American support, Russia succeeded in delaying the debate until next week. The United States also appealed, through Francis B. Sayre, president of the trusteeship council, for an end of the Soviet boycott of the trusteeship council.

OTHER DEVELOPMENTS The new big power clash on trusteeship occurred as the debate shifted from Pushing Meadow Park, New York, to begin committee work here in U. N. headquarters.

1. The United States delegation was reported today to have a plan for a special "watch dog" commission to help resolve the dispute at the General Assembly assembly.

2. Warren E. Austin, No. 3 U. N. delegate, was unanimously elected chairman of the Assembly's new committee on trusteeship.

3. A fight over the union of South Africa for trusteeship was projected today as the trusteeship council met in New York.

4. A report was received today that the Soviet Union had agreed to prepare the statement of the trusteeship council.

5. A report was received today that the Soviet Union had agreed to prepare the statement of the trusteeship council.
