J. E. DOWD...... B. S. GRIFFITH...

TUESDAY, OCTOBER 11, 1949

SENATOR HOEY AND THE AFL national AFL, and for that matter, CIO political organizations can swing in North Carolina. By and large, the working men in North Carolina are political independents—who don't like to take their voting orders from either their employers or their labor cears.

THE American Federation of Labor po-litical strategists who have ticketed Senator Clyde R. Hoey for defeat in North Carolina's 1950 election may have over-looked two or three things. 1. The Senator's great popularity among people of all economic brackets and political faiths:

The comparative ineffectiveness of rganized dabor politics in Tar Heelia;

3. The political intricacies of the Hoey and Graham candidacies.

and Graham candidacies.

The Shelby man, whom Drew Pearson likes to describe as the "swallow-tailed Senator", is a remarkable voke-getter. For decades, now, he has been making speeches and teaching Sunday School classes all over the vast length and breadth of North Carolina, and it is entirely nobelies that he has met and sheath of worth Carolina, and to is evitively probable that he has met and shaken hands with more Tar Heels than any man alive today.

any man alive Ioday.

As an orator he has no peer. And
though the more progressive elements in
North Carolina democracy have not always agreed with his basic conservatism,
they have—never been able to establish
any motive for his actions other than his
sincere desire to maintain the traditional
which enabled him to rise from the position of printer's devit to such eminence.

No one knows just how many votes the

This school seems to have been dominant

This school seems to have been dominant in the case of proposed revision of the discriminatory Displaced Persons Bill of 1948. Practically everyone, including Democrats and Republicans, appears to realize that the 1945 bill is uncharitable, to any the least. President Truman has held it to be "anti-Catholic and anti-Semitic." The Citizens Committee on Displaced Persons—with such leaders as Mai, Gen. William J. Donovan, Mrs. Eleanor Roosevells and Herbert Bi. Lehman—has worked threlessly for revisions.

to it.

The villain of the project, the man who has been sitting on the lid of the traditional American melting pot, is Chairman Pat McCarran (D-Nev.) of the Senate Judiciary

TEST OF INTEGRITY

dents who don't use to base when corders from either their employers or their labor cars.

If they armited over the Senator's vote in behalf of an improved Tats-Hartwister he held of an improved Tats-Hartwisters are more in keeping with prevailing North State opinion than those of his fellow Senator, Dr. Graham. The fact that the Scott-dominated House of Representatives failed, by an overwhelming margin, to repeal the state statute banning the closed shop is the best indication we have that North Carolina believes in the basic objectives of the Tats-Hartsig has objectives of the Tats-Hartsig has objectives of the Tats-Hartsig has been considered to the the tentouragement from North Carolina Democratic Party chipitains, seen the progressive Governor Scott. Speculation about the 1950 races has been rife, much of it wide of the mark. But it is pretty apparent that the Scott forces will healtate to put a candidate in the field against Senator Hoey for fear that Senator Graham will be opposed in retailation.

In a has sent to Washington two Senators of different political, social, and economic views. A good many Tat Heels will be very pleased to leave things just as they are, thank you, despite the wishes of the AFL. In that field of activity sometimes re-ferred to as the great game of politics, there is a school which holds that it is wiser to remain non-committal on controversial-matters than to take a courageous starfd on the right side.

floor for a vote.

A move is underway now—and it's a drastic move—to take the legislation away from
the loaded committee and bring it up for
a vote. Administration sensions and some
Republicans have engineered a move to disccharge the Judiciary Committee from consideration of the DP measure. Republican

We do not know what the Senate will do with the legislation if it does have an opportunity to consider it, but we do know that much light will be shed on the integrity of the members of the Senate by the yote on consideration.

It will be watched closely.

ON ALCOHOL AND COLDS

Committee. He has refused to bring the Displaced Persons legislation to the Senate floor for a vote.

It was the American Medical Association,
we seem to recall, that first exploded
the favorite old myth about the efficacy
of alcohol in treating anakebite and thus
forced the nation's fishermen, hunters and
campers to find some other excuse Jor
carrying a nlp along on their excursions.
But the AMA has now natifally restored

carrying a nip along on their excursions. But the AMA has now partially restored itself to favor in the eyes of the nation's tuppiers by condoning the use of "reasonable doses" of alcohol in aborting the plain, ordinary, common cold.

Explains the erudite AMA Journal, alcohol causes "peripheral vasoditation and re-establishes circulation in chilled cutaneous and mucocal surfaces" which, translated into English, means that it

sends a rush of blood into cold skin or nose lining and thus helps ward off an oncoming cold.

Never ones to advocate the internal use of alcohol-despite our long-standing differences with the Drys over the issue of control — we nevertheless might be lempted to ponder the long-range implications of this beliated beneficition, if ye thought it /had any long-range implications.

tions.

It doesn't. Those who have been nipping, cold or no cold, will keep right on; and it is unlikely that any abstainers will be enticed by the AMA revelation.

Don't go looking for any moral in this little discussion. There isn't any.

GREENSBORO'S LACK OF DISTINCTION

OUR neighbor up the road, the Greens-boro Daily News, gets a good deal of pleasure out of life from time to time by needling the Queen City and its newspapers (See Below).

Ges Below.

We wouldn't for the world deprive the Daily Nees of this source of entertainment, for we love that very strange combination of Texas bravado and New England conservation with the makes the Queen City so delightfully inconsistent and affords an easy mark for journalised 100-8.

Could it be that Greensboro is emitted. For the About Larget list because the course of the Country of the

placed atomic bomb, according to four Emory University professors who were quoted in Sunday's Atlanta Journal.

It's a rather grim subject to be hum-orous about. But we seem to recall that Greensboro recently had to discontinue a couple of fire stations and otherwise curtail

CHARLOTTE'S DISTINCTION

ONGRATULATIONS, we suppose, are due Charlotte for "being singled out as an CONGRATULATIONS, we suppose, are due Charlotte for "being singled out as an important atom bomb target for the Rus-sians." The Charlotte News seems rather set up about it.

set up about it.

It cites an article in the U. S. Neus & World Report which puts Charlotte in a list of 72 quite in the United States which have more than 100,000 population and are within range of Soviet suited planes. Also it quotes civic boosters as boading: "Charlotte must be the most implytant city in the Charlotte must be the most implytant city in the Charlotte Must be the only place worth better than the Charlotte Must be the only place worth better than the Charlotte Must be the control of the Charlotte Must be the control of the Charlotte Must be the Char

being bombed."
There are several flies in this ointment, however, which underpitvileged North Carolina cities may be forgiven for pointing out. In the first place the U. S. News indicates that Charlotte is a one-bomb target, which sounds suppleously like the modern equivalent of what in the pre-atomic age used to be called a one-borse town.

In the second place, when the bombs be-in falling, suppose Stalin, either for lack of combs or out of pure deviliahness, over-cooks Charlotte. What would the red-faced

citizens of the Queen City do about it—sue him for abandonment and non-support? The boosts; could, we suppose, get a guarantee from him in advance, but even so they would have no assurance that it would be worth, the paper it was written on. There seems nothing for them to do but wait and hope.

If a hick town is designated by the custom of everybody calling everybody else Tom, Dick or Harry, or Kate, Busie or Margie, then we are 99 and 44-100 in favor of the hick town. — Pittsburg (Tex.) Gazette.

One of the biggest damned fools in this world is the man or woman who goes quizzing around to try to find out what people say behind his back.

Problems Of Coal Industry

Miners Face Uncertain Future

(Reprinted from U. S. News & World Review)

JOHN L. LEWIS is childing up may be a considered from the construction of the cons

of individual miners.

Price of coal at the mine is double the price of 4842. Coal at the mine now is valued at \$450 at 0.0, on the average. In 1842, it was valued at \$236. at 0.0 at 0

sumers must pay for coal, and has started many or them looking storous of what was the start of the start of

MINIORS themselves are now having to revise their planning for the future. A year ago they were working steadily, takine home big now checks and looking forward to a secure life on retirement, 7 has year, they have been out on strike three times, and, since July, have been working only part time when not on strike.

Jobs in the mines, too, have been declining for several years. Total employment now is down to around 465,000, whereas it totaled 784,621 in 1920.

around 465,000, whereas it totaled 784,621 in 1200.
What is happening to coal, in relation to other fuchs, is shown by examples.
Railroads are shifting from steam locomostives, powered by coal, to Diesel and electric locomotives, powered by coal, to Diesel and electric locomotives, powered by coal, to Diesel and electric locomotives to the principal passenger and freight frains. Recent reports show that railroads had believed the locomotives on all principal passenger and freight frains. Recent reports show that railroads had believed the locomotives. Steam locomotives are being scrapped commotives. Steam locomotives are being scrapped to the locomotives. Steam locomotives are being scrapped to the locomotives of the locomotives are locomotives. Steam locomotives used that the locomotives are locomotives are being scrapped. The location of the locati

Heavy industries and come utilities, too, are shift-ing from coal to oil, gas or water power. Artificial gas made from coal is losing out to natural gas in many industrial areas of the East.

as made from coal is losing out to natural gas imany industrial areas of the European Commonwers, in increasing number, also see Commonwers, in increasing number, also see Colliburner, sales are far above last year. Dealers who have started selling oil burners after being with the commonwers of the

natural oil run dry.

THE big, unanswered problem of the coal industry
I is to find a market at present prices for the enormous amount of coal that it is able to dig in a year.

Demand is alipping far below the level of recent boom days,

mous amount of coal that it is abut on ug in a year, to come days.

Miners, on a three-day week, found they could turn out almost enough a could turn out almost enough coal to meet current occasion. The shorter week made very tiltle insection of the could turn out to come the come of the could turn out to the could be come to put the men on a "no-day" work week. That was a nur way to create a shortage that would bring the could be come to put the men on a "no-day" work week. That was a nur way to create a shortage that would bring the could be come to put the men on a "no-day" work week. That was a nur way to create a shortage that would bring the with the poperators.

For the miners, an accounting of their gains over the nears shows that these gains are real only so long works three days as week at a higher pay scale often works three days as week at a higher pay scale often works three days as week at a higher pay scale often works three days are not lost used to the come of the country of the
