**Action Doubtful This Year
Congress Studies World Plan**

By JOHN M. HIGHTOWER
WASHINGTON—(AP)—A Congress already disputing some parts of the Administration's foreign policy today studied a request from President Truman for a new foreign aid program to build up backward countries all over the world. Specifically, the President wants: (1) A fund of \$45,000,000 to international engineering projects and other assistance to such countries. (2) Authority for the Export-Import Bank to guarantee new American private investments in those countries against the risks of loss through nationalization. Mr. Truman specified "parts of the world as near as possible to certain regions of Central and South America" as regions where the program would be applied, such as East Asia, the Caribbean, the South Pacific and Latin America. A special message from the chief executive on what he called his "cold war program" was sent to Congress last yesterday. Initially, leaders there were cautious about predicting its chance of passage this session.
