THE GLOBE AND OLIVE BRANCH

THE MACI-Solide military men may abrug it of the side as idealistic or impractical or both, but there has been a lot of tails in the past week about adding to the insignal of nations participating in the nation against North Koreas he blue and white globe-and-oiler-branch symbol of United Nations.

There are several reasons why this would be destrable.

First, the war is not only for the deteat of the Russia-sponsord North Korean army. It is an effort to convince the nations of sain and the world that the United Nations will stand firm against aggression probable that there are still many son-communists in Asia who are not convinced that the United Nations will stand firm only as a United Nations of Sain and the world that the United Nations will stand firm against specially many son-communists in Asia who are not convinced that the U. 8. is acting only as a United Nations Security Council is expected to meet this week to appoint a misperialistic venture.

If Asia is to be held against Communism, much of the flighting must be done by Assistics. We are fighting not only for the Master and the Master are susceptible to Communism, much of the flighting must be done by Assistics. We are fighting not only for the Master and the world the many control of the many control

CHINESE REDS NEXT?

WE FIND no reason for surprise in AP reporter Stanley Rich's story in yes terday's News quoting anonymous diplomata as "virtually certain." that Chinese Communists will come to the assistance of the Northern Koreans within the month.

Such action could confidently have been predicted from the day American planes and ships went to the aid of the South Koreans. It's war and Russia certainly will not give up her desire for dominance of the strategic Korean peninsula without a stiff fight. Whether she is willing to use her own troops in the struggle—that's still as much a question to Washington as it is to us. One thing is certain, however: so long as Russia can engage American troops with mercenary forces—be they Chinese,
