# MINORITY RULE STILL HOLDS SWAY

THE CONFIDENCE OF A PEOPLE

ALTHOUGH the total vote on Saturday was disappointingly small, the strong majorities registered for the big \$17,800,000 bond issue package rang with confidence in the future of this metropolitan community.

The needs had been presented in considerable detail in the past few weeks. The voters had been told why new schools, a new library, new streets, a new fire station, new water and sewer facilities were needed.

INSTORICALLY, the American nation has the national Presidential election Nov. 4—a minority, says Gerald Johnson in This American People, consist of "those who get out and do something toward making government decent, if it is no more than to cat a ballet when election day comes."

For the rest-for those who don't vote—Johnson has some pretty hard words. He says they are not American in a real sense—"they are not anothing, so they are not worthy of consideration."

What brought Johnson's fine little book mind was the great disparity in a couple news stories over the week-end. One, out Washington, reported the final tally in

careful planning before construction starts.

If the city and county continue to grow as they have in the past decade, the investment will-look considerably smaller five years hence than it does today, and the increased property valuations will ease the repayment Durden.

THE CHARLOTTE NEWS

MONDAY, DECEMBER 15, 1952

The needs had been presented in considerable detail in the past few weeks. The voters had been told why new schools, a new the station, new streets, a new fire station, new streets and ever facilities were needed.

There was no holding back. The voters having examined the needs, gave their stamp of approval.

It will be years before all of the money is peni, for such large undertakings require are put to the best use of all the people.

Of course we understand that a Presidential election stirs more interest than a bond election, but the very core of the American political system is the proper functioning of government at the local level. Schools, streets, water and sever supplies, libraries, fire stations—these are the instruments of local government and the vehicles of political democracy. A bond issue is not so glumorous as the five-stars of a retired general, but it may have a fire of the state of

# A WORKABLE PLAN FOR AUTO INSPECTION

COUENOR-ELECT WILLIAM UMSTEAD

COUENOR-ELECT WILLIAM UMSTEAD

COUENOR-ELECT WILLIAM UMSTEAD

Chart, to out knowledge, expressed bimself on the subject of automobile inspections,
but we hope he is going to be as forthrightly,
in favor of a new inspection system as was
his predecessor.

Not that the backing, of a governor will
automatically bring results. It is delive under

Kerr Seett. It won't under-Bill Umstead, unless (1) a sound and workable plan is advanced, and (1) the people put pressure on
the General Assembly.

Newest convert to the cause is the North
Carolina Automobile Dealer's Ausociation.

Swinging in behind the Pennsylvania plan,
which uses licened garage and seevice sittions instead of siste-operated lanes, to see the continuing effort to find an answer

# A Day In Deer Country

By VIC REINEMER

THE day started at 3:40 A. M., because we wanted to be at the stands before daybreak. That's when the shooting can start. And that's when the deer, which feed at night when the moon is full, come over the ridges to take it easy in the laurel hickets on the sunny, leward side of the moun-

thickets on the sunny, leeward side of the mountain.

Here were four of us—the old woodman, the
traveling man, the newlywed and I. After plenty
of hot coffee we headed from Andrews through
the Tunquitee country, us to Clear Creek.

We got out of the car and loaded our guns,
then the old woodsman and the traveling man took
out their flashlights and headed for their stands,
wanted to hunt squirries but figured he might
flush a buck our way, headed for the ravine to
hink the deer can't see you.) The newlywed, who
wanted to hunt squirries but figured he might
flush a buck our way, headed for the ravine to
he left. I climbed the ridge between the other
hunters. After easing the ridge I sat down not
a large tree overlooking a game trail and again

When you hunt from a stand, you just take a
nestifice and make the.

wanted to hunt squirrels but figured he might flush a buck our way, headed for the raine to the left. I climbed the ridge between the other lands are considered to the left. I climbed the ridge between the other lands are considered to the left. I climbed the ridge between the other lands are considered to the left. I climbed the ridge between the other lands are considered to the left. I climbed the ridge trail and seem encodes upwind.

When you hunt from a stand, you just take a position and make like a stump. Your nose gets cold and your toes get numb. But you tay out you don't smoke any, if you want a deer. A deer will smell the moffer, or heart he match, or see you handle the pipe or citarette, which might get jammed down your throat anyway if you want to make a sub shot.

A S the sun pecked over the old Appalachian Trail A the jays and crows roused and scolled. Did a deer excite them? If so, no sign of him. The competing was the constant of the property of the property

branches.

After a couple of hours I headed up the trail. There wann't any shooting, except way, in the distance, and by now the deer would be hedded down, and the best bet might be to hustle one out of he laurel.

About II we all returned to the car, empty handed. "I was waiting to hear your shot," said your way. That was about eight scheep your way. That was about eight scheep out way. That was about eight scheep out the trail. Hunter's luck.

The old woodman had seen a couple does. He

up the trail. Hunter's luck. The seams of go up the trail. Hunter's luck or couple does. He fixether old woodsman had seen a couple does. He fixether up to the fixether the Georgia sine. We headed back through the Tusquite country, past rambing shacks. Occasionally we'd see some Mason jar along the road. "Look at the chicken ranches, "chuckled the old woodsman. "They make more of it up here than in Wilkes County—you know what I mean."

The first red folly berries and occasional mistance when the branches above belokemed the season as we would up First Creek. Soon the eld woodsman stopped the car and peered up the

bank to the right. "Let's look at those signs," as

Me got out, and his practiced eye ranged the
bank. "There's been about a done-defranced to
the signs, and the signs of the signs of the
way the hoofmarks are precad—jumped up? And
here went a little feller. But these tracks here took
to be about 10 days old. "My and came to a creatWe drove on a little end to the signs of the signs of the
