A Dedicated Handful Saved The Day

THERE comes a moment in the history of every fast-growing metropolis when the future is suddenly blurred by dark doubts and uncertainties. The importance of Saturday's special election, was rather tremendous. How so many could show so little interest is difficult for loyal citizens to comprehend.

In the vital field of education alone, the voting spelled the difference between orderly progress, and almost cervitation of the metropolitan community that would have the benefits and progress.

Let The Russians Feel The Goods

Could be that some mischievous good in a country and its pick of some mischievous and stretched the Soviet Union's from Curtain, whisked it across the Atlantic and stretched its surreptituously across New York Harbor?

That seemed that Speaker Sam Raysburn had veloed a trip to Moscow by a group of younger House members. The reason reportedly was that if these congressmen went to Russia officially, members of the Communist chamber would have to be received here. Such a dread in occurrence apparently would "dignify them in their pretense that they are democratic legislature."

Not even Little Red Riding Hood is being sucked in by Soviet preference these days, but that is beside the point. The point is that it would do the Kremlin's hirelings a world of good to take a quick look around capitalistic America.

Furthermore, Charlotte is the principal city of a state that has recently climbed from 47th to within the top 20 states in the nation in its mental health properam.

On paper, it looks fine. But looks are deceiving.

The bitter truth is that although Charlotte and North Carolina are accomplishing much in the extremely complex field of mental health, they are not doing enough. The Queen City's own Mental Health Clinic is overburdened and undersupported. The state's hospitals and training schools are inadequate in number; size, staff and services to meet growing demands. The police and the courts are still hampered by some astoundingly methewal attitudes toward had in addition, there is a widespread lack of appreciation and understanding of the problem is of the many former mental patients who are being restored to their families and communities.
