Ike To Go On Air

NEWPORT, R. I. (AP) — President Eisenhower will make a major nationwide television-radio address from Washington tomorrow at 9 p.m. EST on the Far East crisis.

Hoffa Suspends Man

WASHINGTON (AP) — Teamsters President James R. Hoffa, bowing to cleanup orders from the union's court-appointed board of monitors, today suspended one Philadelphia union official and ordered a formal probe of another.

Violation Charged

LONDON (AP) — Red China charged a U. S. Navy plane violated the air space over its territorial waters today.

Dispute To U. N.

REYKJAVIK, Iceland (AP) — Iceland's Foreign Minister will fly to New York Saturday to put his country's fishing dispute with Britain before the United Nations, a Foreign Office spokesman said today.

'Fit' A Flop

MIAMI, Fla. (AP) — Tropical storm Fifi, its highest winds down to 55 m.p.h., today was labeled by the Weather Bureau as "pretty much of a flop."

No Sign

LONDON (AP) — Planes patrolling off England's southwest coast today reported no sign of Capt. Glenn Butt, now 11 days overdue on his bid to sail the Atlantic alone in a 41-foot catamaran.

The Brighter Side

Seems Nobody Had A Quick Answer

(From AP Reports) The isolation booth at a TV quiz show meant just that to John Burns in New York yesterday. Burns stepped into the booth, answered some questions and tried to step out. He couldn't. Assistants tried to help, but to no avail. Burns then sat in isolation until stagehands managed to take the hinges off the door and free him. He received \$2,500 for his pains and answers.

Sorry, Call Again

Robert Stockton walked into the Bank of California in San Leandro, and was greeted with silence and an empty building. He started to back out but found his way blocked. Police who came to his aid reminded him that yesterday was

Sen. William Proxmire, first Democratic U. S. senator from Wisconsin in 25 years, grins as he stands with his wife and listens to election returns reporting his nomination to a six-year term.

Record Voting

Democrats Post Primary Victories

By ASSOCIATED PRESS
Democrats, turning out in record numbers, posted major voting gains in yesterday's 10-state primary elections. The party upsurge stood out particularly in Wisconsin, Minnesota and Utah. It came on the heels of Democratic victories in Maine on Monday.

The strength of the Democratic turnout featured what was otherwise true to form voting in the year's last big series of primary contests for congress and governor. In Wisconsin, Democrats topped the combined GOP vote for the first time in this century. An unprecedented turnout in the cities, particularly Milwaukee, rolled up the Democratic total. Rural Wisconsin still favored the Republicans.

Utah Democrats displayed unprecedented strength in nominating Frank E. Moss to oppose veteran Republican Sen. Arthur V. Watkins.

And in Minnesota the Democrats rolled up substantially bigger votes than the Republicans in almost all contests. The size of the Democratic turnout poses a threat to the Republican Senate seat held by Edward T. Healey.

The nominee to oppose Tye is Rep. Eugene McCarthy, 42-year-old congressman.

Generally, the established political pattern prevailed as Republicans and Democrats tapped their candidates yesterday in Florida, Vermont, New Hampshire, Massachusetts, Minnesota, Wisconsin, Arizona, Colorado, Utah and Washington.

These were the major results: 1. Sen. Seward Collins defeated former Sen. Claude Pepper in the 58-year-old liberal's bid for a return to the U.S. Senate in the

Moon Trip Deadline Ten Years

WASHINGTON (AP) — The newly established National Aeronautics and Space Administration has detailed plans to probe the skies with a whole series of earth satellites. These are for the year ahead. For the more distant future NASA is already at work on projects to explore the moon and then move on to the planets.

NASA's program plans were disclosed for the first time at a packed-to-capacity dinner meeting of the Institute of the Aeronautical Sciences last night.

They were outlined by Edgar M. Cortright of the Lewis Flight Propulsion Laboratory at Cleveland, a major unit of the National Advisory Committee for Aeronautics. NACA is in the process of space-age transformation into NASA.

THREE STAGES

Cortright said he believed that through the NASA programs man would:

1. Be placed in orbit around the earth within two years.
2. Land on the moon and return to earth, within 6 to 10 years.
3. Undertake exploration of Mars, but certainly not for at least 10 to 15 years.

Cortright described 16 space experiments which NASA has ready or can get under way within its first year of operation. Some can be combined, so that the actual number of launchings required has not been determined.

Seven experiments involve satellites weighing between 100 and 120 pounds, launched into orbits some 200 miles above the earth.

One satellite, used in geodetic measurements would be equipped with a flashing light so that it could be sighted simultaneously from various tracking stations. Two satellites would be specially designed to study the earth's cloud cover. Others would investigate aurora, air glow and primary particles which color the early morning skies.

A 100-pound satellite inflating to a diameter of 100 feet, for studies of communications, radar and air density, would be launched before next July. Some of the satellites in this series would carry living organisms — yeast, initially — into space.

None of the proposed experiments would involve satellites weighing more than 200 pounds, orbiting at more than 200 miles and serving as stabilized platforms. Some of the larger satellites might be sent aloft before all of the 100-pounders were launched. One of the big satellites would carry into its orbit an atomic clock, a complex device making use of resonance within the atom. It would be compared with an atomic clock on the ground as a check of Einstein's theory of time in space.

Others in the large category would carry optical or radio telescopes to study the stars.

Baxter Given Smoke Citation

Citation on violation of the city's anti-smoke ordinance was delivered this morning to the Central Lumber Co. office of City Councilman Herbert H. Baxter at 300 S. Brevard St.

Charles S. Frost, director of the city's air pollution control department, said he delivered the notice after observing heavy smoke from the lumber plant's smoke stack.

At approximately five-minute intervals from 8 to 9:30 a.m., heavy smoke issued from the stack, Mr. Frost said.

Mr. Frost said he was informed at the company office that the boiler plant had been shut down for six weeks and this morning it was being operated as an emergency measure. The regular fireman was not on duty, Mr. Frost said he was told.

Effort to obtain further explanation from Mr. Baxter was unsuccessful.

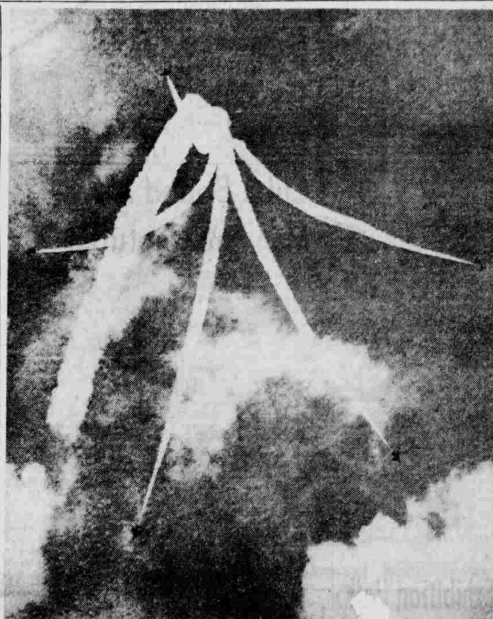

Mr. Baxter had left for Miami to attend the annual session of the U. S. Conference of Mayors. Under the new policy of enforcement, Mr. Frost said that citations after Sept. 1 will be counted against violators who after the second notice the operator will be called to appear before the board to show cause why the plant should not be closed in the event of a third violation.

10-YEAR-OLD GIVEN HONOR

KANSAS CITY (AP) — It was just a little footbridge undergoing repairs and no one thought to have any fanfare at its reopening. No one but 10-year-old Barbara Wintz, who lives in an apartment overlooking Brush Creek. She used the bridge often to go to shops in the Country Club Plaza on the other side.

While workmen were replacing the wooden platform with concrete, she asked Park Department engineer Vernon Jones if she could cut the ribbon at reopening. The park board had no ceremony in mind but it arranged to have Barbara supplied with scissors and ribbon.

The Plaza Merchants Association heard about the girl's plans and decided to invite its members. Barbara persuaded her classmates and teacher to attend. The board chipped in with a commissioner to make a speech. So today Barbara will cut the blue ribbon and be the first to cross.

White House Denies Report Adams Out As Ike's Aide

NEWPORT, R. I. (AP) — The summer White House today denied a published report that Sherman Adams, target of hot fire in the Bernard Goldfine case, has resigned as President Eisenhower's chief aide.

"It is just not true," Press Secretary James C. Hagerty said in comment on a resignation story in the Laconia (N. H.) Evening Citizen.

"There has been no resignation in any shape, form or manner submitted by Gov. Adams," Hagerty added.

The Hagerty denial came on the background of the Republican political disaster in the Maine elections Monday. There had been reports in Washington and elsewhere that Adams will go soon as Eisenhower's chief aide because GOP candidates regard him as a major political liability.

The controversy over Adams flared last June when House committee investigators brought out that the wary, white-haired presidential aide had accepted costly gifts and favors from Goldfine at a time the Boston industrialist was in trouble before government regulatory agencies.

Figuring among the gifts and favors were a vicuna coat, an Oriental rug and payment of about \$2,000 worth of hotel bills for Adams and his family.

Adams acknowledged accepting gifts and favors but testified he never exerted any influence in

Boulevard Location Proposed

By EMERY WINTER

New Staff Writer
A two-million-dollar, 175,000-square-foot merchandise mart to further enhance Charlotte's position as a wholesale distribution center is in the planning stage.

A modernistic brick, concrete, aluminum and glass building is proposed for an eight-acre site facing Independence Blvd. at Briar Creek Rd. near Charlotte Coliseum.

Dwight L. Phillips, Charlotte developer and builder, heads the company planning the three-level structure which would be the third largest merchandise mart in the nation. Only those in Chicago and Dallas would be larger.

Mr. Phillips, who owns the land on which the enterprise would be erected, said if the enterprise develops as expected the building will be quadrupled within a few years.

REZONING NEEDED

Before the building can be erected, however, some of the land must be rezoned. The property facing Independence Blvd. must be changed from Office Institutional to B-1-A, which means building institutional with no alcoholic beverages to be sold on the premises.

The rear of the property already has a B-1-A classification. Petition for rezoning went before the Charlotte-Mecklenburg Planning Commission this morning and the hearing on the request will be held Oct. 2.

The building, which would have a frontage of 360 feet and a depth of 150 feet will have 300 showrooms with space for display of 1200 lines of merchandise on its three floors. If expansion is carried out as expected the building will eventually have 1,000 rooms with space for display of 3,000 lines of merchandise.

AIR CONDITIONED

The building would be of brick, and prestressed concrete construction. Floors would be Terrazo or vinyl tile. The entire structure would be air conditioned.

Expansion of the building would be made at the rear and by addition of two more floors.

Architect for the proposed building is William Thrift of the firm of Edward K. Sheppard & Associates of Charlotte.

The showrooms would serve as permanent year-round display halls for hundreds of manufacturers and distributors of men's, women's, children's clothing, gift items and makers of other articles of merchandise.

Mr. Phillips pointed out that no furniture would be displayed in the building so that it would in no sense compete with the High Point Merchandise Mart.

The showrooms would be 16 by 20, 16 by 40 and 32 by 40 ft. and would front on corridors. Showrooms would have glass fronts and buyers would thus be able to
