By this or any other definition, the proclamation of Kournd Henlein, Sudetin Party leader, was treason. He called down God's blessings, a plea which he routed by Berlin, on the Sudeten's fight to "return to our home in the Richt." Preceded, as it was, by the most overt acts of defining the sudeting the nance against Czech authority, by a free access to military supplies and Nari paraphetnalia over the German line, by a constant running to and from consultations with littler to consultations with the Prague Government, by pitched battles with the Czech police and military detachments — preceded, in fluie, by rebellion sgainst the Czech silve filer Henlein's proclamation was treason in any language. No Money, No Books; No Books No Lessons; No Lessons Dear Sir:

Clourlotte.

Dear Sir:

I have been under the impression for quite a number of years that we had a compulsory school law in this state. If so, just what is it and that is the age limit? Is if fautten or alaten? Can a child teylic years old be deprived of a year's echololium just because his parents. are not in financial shape to buy book are not in financial shape to buy book and pay the required free that it take to attend one of the junior high school here? That is the predicament my bois in: A teacher made the remark one day last week that a student who did not have the required lesson prepared income to school. And how can be prepared income to school. And how can be prepare his lesson without books? I made an appeal to the principal of the school, but so far no answer and no action. My boy wants to go to school and be able to keep up with his classmates, and he has a satisfactory record.

and he has a sutsusterry recorn.

It seems to me that with a \$5,000,000 surplus sales tax money in the State treasury, the State could furnish more than it does. Other states in the North and West furnish more than is turnished here.

nished here.

I know my boy is not the only poor boy in fown. What do the other poor boys that ace do? Do they go to school and how do they mixing? If they are not in school and too young for employment, what kind of citizens do they nake?

I do not know where to turn to get litra equipped for school.
