#### They All Do It

South Carolina Legislature heed this work with the task ling two vacant circuit judge-lend this it did with little lost may The procedure was simple: vernakers simply clevated two it own number to these judicial

Sensker J. Strum Thurmond of Shyeshed, enickly and without op-setton, was elected judge of the life district judicial circuit court; and Sensator L. D. Lide of Marion was the 12th district judgeship with

wen the 32th district judgeship with hence equal ease.

Now, Senators Thurmond and Lide size there not to be first-rate judges.

Chances: are they will. But it is surth noting in passing that the heath Carolina Legislature has once sight availed itself of that time-henced privilege of all lawnahing pickles, bit key city, county, sate, or necktonal: i. e., promoting one of their size members into a steady job when-iver the opportunity presents itself.

#### Better Aim Next Time

great defect in the United States ate and in Senators was ex-ed yesterday when Senator Bailey awa book across the chamber. Series a book across the chamber.
This Bension was angry, perhaps JuShindly so. There is no reason to
Childs him for his unper or for throwing the book. All of us, Senators or
whethers, at some stage in life throw
whethers, at some stage in life throw
things. Even brides of a few weeks'
Senioning have been known to throw
desige, and smore confirmed "hatSection" it is standard procedure.
The detect is apparent, however.
It is that the Senator didn't hit anychilds with the book. The place was

with the book. The place wa ting over the nation's troubles meraning over the nations it there wasn't sharp wasn't snything approaching a bullseye. The book that was sured hit the floor, which didn't went know there was a Sanato salley, much less that he was out-

and when Cotton Ed Smith, an-ther Senator, picked up the book, he suried it, too, but still there were no senation. He hurled the book aid be lively among Sens

Life could be lively among Bena-fors, but it won't be until they im-prove their aim. Bailey may lose a Sew votes on account of the incident. Had his aim been good, he would have received the cheers of a na-diten. As it is, only the book was demaged, and it warn't any good to reserve the country of the country of the start with.

#### We Look At A Star

here is a new star in the heavens Spallon Aurigae. That is, there new star in the heavens as our is a new star in the heavens as our askirbinomers, peering through their askirbinomers, peering through their askirbinomers, peering through their askirbinomers as a suppointed place from the peering there in its appointed place from the peering their peers way from us it lies. And lightly years way from us it lies. And lightly you will remember, travels at the rate of 18,000 miles per second, sind there are 88,000 seconds in every fact; Multiply that by 3,80, and that again by 3,000° and — it's a little diwaying, int it? len't it?

ying, kmt it?

were thousand times as great as seen sun is this star, too, with a select equal to 20 times the discontinuous to the sun, or, thirty, 1,800,000 units. Finand with polar system, it would fill up whole, with only Neptune and a lying westede. But we call it a d in reality it is two — seling as one because both around the center of their

which the mystery in which we deal and here grows are noticed by the last mil-flin arous. And do you call not consist of the minerary Ourselva. We find minerary Ourselva. We don't right now, though, thing what we har, we probably shall recover that constorting belief within the hour.

#### One By One

In the beginning the utility holding companies affected by the death
suchesse in that act which they restitled with all the breath, which is
easy at; that was in them, would
have pobling at all to do with #50.0
the #50 asy, 'It is a nice morning,'
they would not reply, else would
must has all to want. They relied
must have all to want. They relied
that is gargene Court to confirm
that is a want. They relied
that is required or of the weather their low opinion of the weather and the times.

There were two procedures which the act directed utility holding com-panies to perform. The first was to register with SEC. The accord was

panies to perform. The first was to register with GEC. The second was, in due course and as ordered, to dissolve. But so great was the antagonism of the industry that they would not even register. A few unimportant companies aleeped up, but the big ones stayed sway.

Since that time, however, SEC has had a hundred registrants, including some of the giants. Last week American Water Works signed up, and this week Columbia Gas & Electric whipped out its pen. When it did, EEC gave it a friendly greeting, compilmenting the "realists" in the industry and promising that "in cooperation with the commission a constructive job can be done while meeting the requirements of the act."

We would not go so far as to say that this pressages the utility holding companies willingness to lay down their lives for SEC, but we believe it does show that they are resigned to the inevitable and that it in't going to be so dreadful as they thought.

This afternoon's sport pages in The News are the first in many years that have appeared under the tion of someone other than Wade from As has been announced, Mr. Ison has accepted a position as discovered to the source of the

#### The Smoke Professor

Charlotte might well borrow Salt Lake City's William L. Butler, selfstyled "smoke professor." Butler it is who is conducting a gigantic class in the art of building nd who promises that with the grad

and who promises that with the grad-uation of thousands of his pupils the smoke pail of the Ulah city will be reduced not less than 50 per cent. "The all a matter of improper fir-ing," says Butter, other coginacer of the Smoke Abatement Bureau. "Im-proper staking reduces the degree of combustion, causing a great deal of waste. Most people, from the inex-pert housewife to the veteran fire-man, put on too much coal sand have inadequate draft. Most of our motoc forms there. In tust one hour we forms there. In just one hour we can turn out a fireman, or firewoman

able to maintain a smokeless fire."
To appreciate the smoke pail which is Charlotter, one has only to accend to the upper reaches of any downtown office building. From innumerable chimneys and zmoke-stacks it is beighted forth to hang above the city like a dum-colored blanket. Nor are industrial plants the worst offenders. Apparently, many firemen in the business district endeavor to impress the boas with their industry, as a widenced in exact proportion to the amount of moke which they are able to preable to maintain a smokeless fire which they are able to produce. We have in mind a particularly fine specimen of smoke pro-duction in the grand manner, emanduction in the grand manner, emanating from a small building in the
immediate vicinity of Independence
Square. When that fellow is in the
mood, and he generally is, he can
turn out a thick yellowish column
which, for quality and quantity, is
worthy of General Johnson at his
beat. He is without a per, but competition among his neighbors is
keen—so keen that in damp weather the street below is all but obscured to the watcher above.
Yes, we undoubledly have need of
Mr. Buller. It might be well, however, to give him specific directions
as to how he may reach the city. We
fear that he will never be able to
penetrate our pall.

#### The Work Goes On

### IT SEEMS TO ME

climbed up into the thumb Status of Liberty, Months so by in which I fall to visit the Metropolita Museum of Art. Poe's cottage is know

Museum of Art. Poe's cottage is known to me only through fleeting jilinpees as the text takes me to a fight or a ball game at the Yankee Stadium. But when I get no Washington everything is different. Then I am infected with the tourist spirit and follow guides who identity the statuse in the Capitol and give out the price of all the corrected to which are metry tool. In fact, the American the American text of the corrected to which are metry tool. In fact, the statuse in the capitol and give out the price of all the

capited and give out to prote or as use protrains, which are pretty bad. In fact, it seems to me that the wedgras. Covernment sertifies much better harpings for itself today in art projects than a contrary ago, when Congrains was a sucker in voting appropriations for any foreign visitor who wanted to do Washington or Jefferson or Maddison.

Last week in the First Entrance iting firemen, I made Through The the grand four of the Frent Door public rooms in the White House. I had

been in the press room over in the office end of the building, but this was the first time I ever had a chance to go upstairs.

It is curious how "

chance to go updairs.

It is curious how the spirit of Lincoln dominates the mansion. Of all the Presidents it is his personality which has set a trenstaining importi upon the walls. There are portraits of Washington galore, but he seems a long way off, and if I remember my history the White House was burned and rebuilt since his time. You do not feel today that he walks the corridors.

of course, many alterations have been made since the Civil War, and yet the first gasp of awe comes from the tour-ists when the guide says, "This is the room in which Lincoln slept." Certainly room in which inheads been applied since, and the tiled bathroom could not have been the one which Lincoln knew Pictures and hangings have been adde

But this remains his room in spite of Presidents who came before him and who have followed after. Nor will they be any in the future, I believe, to alted the fact that here is one corner of the White House which is forever Lincoln.

I have heard a vague rumer which relate that there are Freedom Of The some who say the Clothes Press great Emancipator still gides at night out of a huge clothes

and paces the room as he must walked alcopless in the 1860s, worwalked sleepless in the 1860s, wor-cover bad news from Grant, and worse from Meade. Here, I sup-the germ came to him for the pose, the germ can Gettysburg address.

I believe some inner prompling of his presence comes to all who tiptos into

#### The Town That Moved

#### (Wall Street Journal)

(Wall Street Journal)
The courts of Arisona will soon be called upon to decide which of the large copper companies removing 'ore frum a mountain, is responsible for the shifting of the site of the town of Jerme. Bereal years ago, it was noticed that the mountainside on which this clown, with a population of Soloy personal stands, had begun to move. At first, it siftled only a few inches a year. In the heat few months, the city has slipped down the mountainside approximately own the mountainaide approximatel twenty-five feet, causing damage to man;

## Visiting Around

What's His Platform—Pree Gas and Oil?

Bill Moore, the veteran depot opera-or over at Gulf, says his candidacy for mayor over there seems to be warming up somewhat. There is strong talk of Vann Oldham and Pearle Smith getting in the ring too.
