EDMENDAY, JANUARY 26, 1935

That "Eighth" Rule

SEC's new ruling on abort selling is an ingentous thing. If Consolidated lighted ink, for example, is going siders and down and you have the injury idea that you could lay by a fills store unto yourself by hopping set and riding it for a fall, you cam-pet; sell stars which you do not write in Consolidated Black Ink ex-

that your broker pleases.
But if CRI is going up and too fast, in think, the rule will not operate the handcuffing of the short-haded. On a rising market, quotans: 1-3 above the last sale are paping all over the place, and you is grab one with ease. This will see the effect of keeping the marist ross, running sway with itself the up-grade, as it will on the wangrade; and both are desirable, he only great risk is that the beautiful and condensable short in the superside; and both are desirable, he only great risk is that the immediate and condensable short in the bottom without profit-taking the bottom without profit-taking the hottom without profit-taking the bottom without profit-take the way, which itself is suppose act as a check.

A Senator Is Seated

Monday, John Milton by took his seat in the to Harry e, how Governor of New Jer-this man Militon is the same of a former Judge John J. Warren

Bet the layer is affected by magnetic, disturbances as which are the same and above all it is affected by sun spots, which, of course, are great magnetic storms on our central luminary. Lax night's lights were probably due to the ac-tion of these sun spots, which just now are very powerful, on this Heavi-side Layer.

Senator "Pat" (for patronage) Me-Kellar of Tennessee has utred Pres-ident for the patronage of the patronage of the form of the patronage of the patronage of the State and the Pederal Government buy up the power systems of Zen-messee. And Goes Senator "Pat" (for patronage) McKellar decry this more because he is a great believer in private initiative as opposed to state socialism, because he is skep-tical of the State's shilliy to run a power system efficiently and ecopower system efficiently and economically? Nope, Not a bit of it.

The real purpose of this urging the resident to turn down the proposal,

"Obvernor Browning and Senator Berry are going to have the strong-est kind or political opposition in the state, and they are simply try-ing to cook up a plan that will win them some support."

ing to cook up a plan that will win them some support.

If anything at all could serve as a red flag of warning to make this country stop, look and listen before it lets the greedy politicians take over the utilities, this incident ought to do the work. Senator McKellar is the fellow responsible for that noterious "boodle book," as government document listing every Federal job not under Ctril Service. As chalirman of the Senator Post Office Committee, he has blocked every move to take postmasterahips out of politics and piace them on a career brais. In addition to that, he is a bludgeoning, blundering old blusherakite.

Governor Browning is an up-and-coming politician who owes his election to Boss 2d Crump of Memphils, whom he disched in the hope of becoming best himself. The method of

coming boss himself. The method of his coup d'etat was to call the Legis-

lature in special session and have it amend the primary laws so as to apportion voting strength on a county rather than a popular basis, thus effectively subordinating the will of the people to the will of the Browning organization.

And Senator Berry—Senator Ber-y is the industrialist-labor leader ry is the industrialist-labor leader who got into office by the appoint-ment route, first by President Roosement rous, first by Fresident roose-veit as co-ordinator of the remains of the NRA and thereafter by Gov-ernor Browning as Senator, from Tennessee. He is the same citizen Berry who is suing TVA for dam-ages running into the millions on account of flooded marble lands on which he holds options—bought up, TVA charged, more on the strength of inside knowledge that the lands were to be covered with water than

And it is this triangle of politicians, McKellar, Browning and Ber-ry, who are eager to get the utilities ry, who are eager to get the utilities in Tennessee for their own political factions and to keep them out of the hands of inimical factions. Buccoss would mean a rich helping of pis for thousands of their supportar, executive jobs for staiwarts in their organization, a stranglehold on industry and the end of invention, discovery and pioneering in the power business.

Uses of a Baumes Law

As to the guilt or innocence of as to the guilt or innocence of the young man Bruce Shot who is charged with the killing of Police-man Rape of Hunterstille, we have no slight knowledge or even a theory, at the same time his arrest for this crime has caused the police to check up on his criminal record, and it is a beaut:

of oil his criminal record, and it is a beaut!

October 4, 1928, sentenced in Malimora to serve five years on four charge to program of the common to three years in the North Cardina penitentiary for breaking and entering. Later tonoferre to a prison earny in Iradell County, he secaped, and the common of the

to appear when called for trial.

Two things are immediately apparent from the criminal activities of the mac, will in this low thirties.

One is, that he covered a lot of territory. The other—that the law might chastise him again and again, but that it was making little headwar in reforming him so that he

the amisbility of my opponent, but his logic. I theroughly agree with him that no cause should stand or fall upon the fact that it is led by some atrumy man of winning personality. But the converse is true. No cause should be chucked out the window simply on the ground that any one of its proponents appears to be an lide fellow, unlettened in anything save cafe commonts.

Navigation on the Catawba

Navigation on the Catawba

(Cot. Warren A. Fabr. Lineoin Times)
In the early days of the development
of this section the Catawba River furnished water transportation from Rouselles' Ferry to Charleston, 8. C. Large
flat boats were used, the power being
supplied by Negrowa, using long poles.
A number of men no each aids of the
boat, with their long poles resting on
the bottom of the stream, would walk
the full length of the boat, chowing the
craft along. Coling flown streams with
the current good line was made. Of
course, progress was slower when showing the boats up drieam against the current. But there were long stretches of
the river where the current was stoughted
and fairly good time rould be made swee
coming up stream. The should or bidges
of rock and sand bear in the river were
secretized through canals cett' acround

road intersections were placed as far as 60 miles away directing traffic to the port of Land's Ford. In making the voy-Leaving sainthood out of it, I must tooffees that I am a little worded because recountly a pleos was "called to my attention," as the phrase rose, in which a man accused, me of being "given to periodic crubes on returning men and movements."
