If City Court Gets Tough. A Gent Can Alicoys Appeal

In the news columns the other day presented the court record (City Police Court only) of a local man who is once again, as he often is, in bad with the Law. His name is of no consequence; it is the court's evident inability either transgression's way that calls for com-

ransgression's way that calls for comment.

Twent-six times, since September 1932, had he been in City Police Court Charges against him have ransed all the way from murder sequitted by a jury in Superior Court to traffic violations (two). For the main part, however, his appearances have been due to liquor law violations, on which score has been in court thirteen times. Some of the cases against him were dismissed in others he was convicted and assessed small fines, ransing up to 800 plus the toots, which were paid. He has never served a day's time on the roads.

On the four occasions when the judge of City Police Court attempted to hand sentence, an appeal to Superior Court was taken invariably even though in all instances the road sentences was suspended by the lower court and get your man on the roads when any others or was suspended by the lower court and get your man on the roads when a violates the law again), and here is smething to notice.

Disposition of the four appeals from suspended road sentences in City Court were as follows:

1) Pies of guilty; 80 days suspended on payment of the costs.

2) Vertict of not guilty entered on motion of the foliation.

s) Nol-pressed with leave to reopen.

a) Pick of guilty; 90 days suspended to payment of costs.

Al Piez of gallity: To cays are payment of costs.

In other words, where the judge of tilty Police Court got truth with this shronte of linder and sought to pin a read embende on him, there came invariably an appeal to Superior Court. There he was twice let off, twice taxed with the costs only the product of the costs of the cos

The record speaks for itself, and pointedit, on the fullility of the lower court
in dealing with one who refused to pay
any attention to the law and on the
avoidance of punchiment which Euperier Court in Mexichenture County holds
forth to those who know the ropes.

Risks Of War

A Nation at War Must Pay For Its Belligerency

There is only one conclusion to be drawn from the continued sinking of American ships: that Germany intends to attack our shipping with all of the weapons at her disposal, whenever and

weapons at her disposal, whenever and wherever and lowever she can.

Even before the Nazi "rattlesnake" struck the Bold Venture and the Lehish, this reality should have been plain enough to us. We are now engaged in a shooting war with all high seas units of the German navy. We must be prepared for more and much worse news of naval and merchant marine losses before this war is fought out to a decision.

before this war is fought out to a decision.

The latest sinkings, which certain hot-blooded members of Congress are wont to call "outrageous," are nothing more than inevitable results of the risks any nation takes when she goes to war.

We must learn to take such news, bad as it is, in our stride, nor let it detar us from the bold steps which this crisis demands.

from the bold steps which thus crass demands.

The pity of It is that there is a small but highly obstructional minority in the nation and in Congress who persist in believing that we are not at war. By so believing they expose our ships to the risks of war without giving them mens to defend themselves.

As long as we take the responsibilities of war without availing ourselves of the rights of belligrency, we are going to pay in full the price of self-deception.

Hiller May Confess the Aim, But He Can't Fool Us

Adolf Hiller's Germany is fighting to dominate every acree fland, every square mile of water, every man, woman and child on the surface of the earth.

That is what this war is about, And yet, after 2d months of bloody and—for our side—disastrous conflict, there are full far too many of these who fail to see what. It happening. The Italians didn't believe il, or the Blugarians, or the Rumanlara, Hisher did the Heltin and the Ferench and the Russians, No-body believed it except a few cranks like Winston Churchill and Anthony Eden. And those strapping young men who sang as they marched: "Today we own Germany, tomorrow the whole world." The awful truth is, when you come to think about it, that we don't believe anything, we don't believe Germany is on the way toward world dominate the world? The awful truth is, when you come to think about it, that we don't believe anything, we don't believe Germany is on the way toward world domination. We don't believe Germany eren wants to dominate the ward'd. We just mosey alone, eating more food than any-body elae, stroking more eigareties, driving faster automobiles, wearing finer feloties, seeing more movies, and with like belongs to us by inheritance.

But there is one thing we believe. But there is one thing we believe that one of the pride that pobody and liek us. We're americans, by glory, and we're invincible. We are overstuffed with the execute of the pride that goeth before a fall.

And unlies we snap out of it, what a catelymic debacle it is going to be.

We are not coing to help ourselves by saving that Hiller and Germany con't enalave the world. They are doing it faster than it has ever been done before.
