Lewis that all coal mine workers be coerced into Johning the CTO on threat of losting their jobs if they didn't. It is not freedom or liberty for any worker to be told that he must Join any organization as a condition of employment. The President has said as much, and it is on that point, we take it, that he and the CIO have come to a parting.

The liberty and freedom that Mr.

The librity and freedom that Mr. Murray is so determined to preserve reduces to the license of his unions to use violence, threat of violence, and economic atrangulation to gain their ends—in abort, to do as they please and as they have been encouraged by the Roosevelt Administration to do.

When this license interferes with national defense and national safety. It is

In all instances, including those during the present crists, the Government, backed by public opinion, has moved those patriots down.

It remains to be seen whether the CIO can get away with this brand of selfish and dispatrons patriotism.

One Soldier

His Offense Points Up the Army's Admirable Behavior

Army's Admirable Behavior

There was a slory in the paper last week about a soldier on maneuvers in foouth Carolina who broke into a home and stole some \$40 worth of sliver and other valuables. He was caught, pleaded guilty in a civil court to house-breaking and larceny, and was sentenced to a year in [40].

His nickname was "Broadway," which seems to testify to perhaps not the most pointaking of upbrinding. Even be tried to lump out of a second story window, evidently to commit subcide.

The story to reconstruct here not at all to reflect discredit upon the 400,000 and the reverse. When you come to think about it, the conduct of the treeps has been a marvelous textimonal in the young men of America who compose its armies. Oh, there have been a few fights, in all probability, and perhaps a lot of throbbin heads and dry throats on mornings after a holdes, the boys will be boys and are half-expected to be.

But this item about the solder who

expected to be.

But this item about the soldier who broke into the house stands out breause it was so startling at variance with the behavior of his bundered of thousands of fellows. And even this poor drell had the deceny to feel so peculiarly the distract his had brought in himself and his outlit that he wanted to end his life.
