It is, we trow, a bargain well attuck. Lower rates are destrable, as it is for the government, with its right of eminent domain, to refrain from actively competing with its energetic eitheans. To be sure, the question may be raised of the President's ability to bind the legislative branch of the government with a dent's ability to bind the legislative branch of the government with a promise not to step out and dot the land with power plants; but we think it answers itself. The impetus for active competition has come pri-marily from Mr. Roosevelt himself and a few overresious henchmen. The people at large have either dis-approved or been uninterested.

Not All Lost-Perhaps

It would be easy to be cynical about the Brussels conference. For on the face of the matter, it seems attangenit of practical action, to be realistic, it was bound to be a failure from the beginning. For there was nothing practical the signatories of the Nine-Power Treaty could do to half Japan's expedition into China - short of resort to war. And it is a somewhat dibbous proposition that the proposition of t

To boost prices to the 1928 levelued in the cotton and corn plowed up? To raise farm prices— and so were and are all acreage restrictions and the politicies of Mr. Wellace.

AND GOT THEM

For the proposition that high taxes increase litting costs, Mr. Roosevelt is the leading authority. His taxes have been constantly increasing. All these things raise prices and the cost of living. Many of them were intended so by do. "We planned it that way."

Prom December 13, 1938 to September 10, 1937, living costs advanced 3.2 points. From September 103.6 to September 107.1 commodity prices Increased 3.2 points. Payroll increased 1.5 points and werenge weekly earnings 6.2 points. The two principal ingredients of living costs—liabor and raw materals—have advanced much further than thring costs. That is fairly good rough evidence, taken with labor and raw materals—have advanced much further than living costs. That is fairly good rough evidence, taken with the other causes of high prices just discussed that there is very little from left among the obvious crimes of so many contributing cupilita to biams "monopolistic practices" for more than an infinitesimal part of the advance. It sounds like a cry of "pirates on the stabbild bow" to distruct attention from "mutineers in the footle."

But I ampect that the merchante might have been doomed to be disappointed had the Windsors arrived. In the days of his princehood the Duke was known as one of the most assumen for the Empire, but there is no record that he maintained a balance of trade, At my elbow lies a press association story of the Duke's most recent spending spree at a church bearast in Patis.
