Three in the News

Three names, famous and in-amous, figure in the news today. Two of them take up the front pages, and the third is buried far back in the inside. They are:

Lord Huler

Entier, in his address to the universe preservely, said at least two fitnings that are of immediate instead of the United States, and which in fact seem addressed to us. The first was that he thoroughly approved of the Japanese policy in 6thms, and that he hoped for a much classer collaboration between 6thms of the property of the first property of the second was that Germany and representation to maintain the policy of following probabs of German blood everywhere in the world and "protecting" them. The first we take to be a warm-first. And the second amounts to a

And the second amounts to sitial of the sovereignty of this overiment over the several million steman-born people now on this dimand to more. What he probably had in mind, above all, was as he Mouroe Dourine and the mildies of Germana he has planted in sized for the purpose of bringing hist country under Nati control. The action of the British Cabinet.

And, despite the correspondents, it seems a little imbelievable that the cynical deal under which; in violation of Eng-land's jiedged word, dermay is to set Austria and Czechoslovakia and Haly to wit Spain, is motivated purely by the commercial interests it London's City," which the Cabi-net represents. What seems more likely is the Lose mee have actually net represents. What seems more is that these mees have actually stanted by the naive propa-that faceism is a bulwark a communism. Not First, But Second

By the Uniform Crime Reports of the FRI, we see that Atlanta, draf-her, has crowded us out of the FRI, we see that Atlanta, draf-her, has crowded us out of the same of among American cities for murder and non-needigent homicide. In 1937 she had 246 such cases, or an average of about 445 per 100,000 peo-ple in the same year, according to this report, we had 37, or, say, about 40 per 100,000.

60 per 100,000.

But we are still safely in second place. And second is no mean parformance in this league. For instance, we had more than three times otherwise in this league, the instance, we had more than three times
as many cases as Boston, erem with
its 791,000 people! Or, again, our
average of 40 per 100,000 stands
against the national average of 6.7
for cities of our size, or 3.5 for such
lowns on the Pacific Coast; or 19.5
for all our South Atlantic towns of
the same category; or 1.2 for like
towns in New England!
Well, but you know an easy answer to all that? The black man in
our midst? All right, explain this:
Columbia, with a population of 82,
000 at the last census, had six murders and non-negligent homicides;

ders and non-negligent homicides; Jackson, Miss., with a population of 48,000 had six; Durham, a blacker town than ours, with a population of 52,000; had II; Winston-Salem, black man's heaven in these parts, had 22; Mobile, with a population of 118,000, had 26; Memphis, black, bad Memphis, with 23,000 inhabitants, had 36, one less than we had; and New Orleans, with nearly half of its 459,000 people made up of Negroes, had — 79!

Two Pretty Businesses

The beauty about the gold mining business is that there's no
middleman to cut in on the swar,
You take the ore out of the ground,
you separate the gold-bearing flakes
by flotatablon, you small 'em down,
and when the dross is fired off you
have a remainder that's money in
any man's language. The gold brick
poured out at the Capps Falli gold
mine Saturday, the first produced,
will go to washington, and be exchanged for a check drawn on turited Sintes Treasury. No sales
department is mecasary, and there
are no wholesulers and retailers to are no wholesalers and retailers to leaf with.

are no wholesalers and retailers to deal with.

It's a pretity business, all right, and if the Capps Hill mine bears out the appraisal and the expectations of its entrepreneurs, it and other mines in this gold-bearing area may altimately comprise a revived industry of such proportions as to add measurably to the wealth of the Carolinas, especially of Charlotte.

Nor is that the only pretty business developing in which Charlotte has a proprietary interest. Its own Elshop Grace, the "Black Christ" and head of the House of Prayer for all the People, is carrying competition in Salvation straight to Harlers' Father Divine. Eventy years ago the South had visited upon it a plague of carpetingers. Now, it a plague of carpetbaggers. Now, at last, we are about to get even through the medium of one dark man carrying a Gladstone bag.

The Perfect Monument

The Perfect Monument

Not. only a handsome but a thoroughly practical and Christian memorial to the late William distance the will be the charity wing of the Prestylerian Hospital made possible by the girl of Mrs. Lee and Martin Lee. We can imagine no form the memorial which would better project. Mr. Lee's personality throughout succeeding generations. He was a builder, and this monument to him will be wrought from bricks and mortan. He was a creator of the useful, and there will be thousands of grateful persons to testify to the uses of hospital treatment for the indigent and the unfortunate. He was a practitioner of the science of engineering, and it is a happy inspiration that the wealth he accumulated in his profession is to be an sugmentative factor in the science, and practice of medicine.

As to the generosity of Mrs. Lee.

an augmentative factor in the science and practice of medicine.

As to the generosity of Mrz. Lee and her son, this, too, is a further appropriate projection of Mr. Lee's character. The community is to gain from the memorial to his*life as it did from that life itself.

One More Prediction

The last time we raked what's left of our reputation as major prophet, it was on the exceedingly hardy pre-diction that Mar Gardner, for all his having coid-shouldered the un-offered job of crar of the New York his having cold-shouldered the un-oftened blo of care of the Kew York Slock Exchange, would take it. The nore we think about that, the poorer guess we think it is. And so as to hedge, sort of, and to present hedge, sort of, and to present prestign as prognosticators, we are going to make another bold purphecy. Cottem and tobacco farmers will

effective when accepted by the legislatures of three-fourths of the states or, if Congress so chooses, by conventions in three-fourths of the states.

It is now proposed to sire Congress atone the power to propose amendments, thus cutting out the states. Also, to permit amendments to become effective if rathfied by people of two-thirds of the states (instead of three-fourths)—not through their legislatures or conventions but by printing proposed amendments on the ballots to be voted on by the people in the next general on by the people in the next general election which occurs more than 60 days

Usual Voter by votes. They are untrained and have no untrained and have no time to study them. Anybody who ever saw the blank be-wilderment of the average voter on proposed state mendanents knows that is a farce. That is why we have legislatures and a representative government. We wouldn't attempt to make Pederal laws by passing bellots around-but this proposes the much graver task of making a Pederal constitution that way. It also puls a change of the constitution on the same piece of paper—to be voted on at the same time—as the hot partians lause of persons and policy in the confusion, bomb, ballyhoo, passion and pright doe of a general election. The convention method of ratification assembles experts elected by the people to study the amendment and vote upon it as a single store, regardless or party or any other continuers whatever confi the proposed amendment.
