Glass Might Best Resent This By Leading the Fight

shouldn't blame Senator Carter of Virginia if he sued the pip-ik columnist whom (in another pawe find saying that Robert Rice molds is a sort of Carter Glass Dem-- one who likes the President d foreign policy.

mator Glass has opposed the do-tic New Deal often and bitterly and bitterly olds has generally supported it) it it is simply not true that Glass has sposed the President's lovely policy, if the contrary he has been one of its bot, enthusiastic supporters, and the bot fault he has ever found with it was sat it did not go far enough to suit him. And as for the suggestion that there any comparison between the two men sh, well, in the days of old John andolph that would have been occas-for pistols for two and coffee for a at dawn. Senstor Class is a man of est intelligence, integrity and dignity, is political enemies respect him as aimly as his friends. But is there any-idy who actually respects Robert Rice

He is a thoroughly trivial man with prical and dangerous ambilious.

In point of fact, Senator Glass seems the to be the obviously indicated man lead the fight, which appears to be the making on the elevation of Reyn de to the post of chairman of the mate Military Affairs Committee.

As much as any Senator, Giaza has been as any Senator, Giaza has been above the shabby business which easiled practical politics. He must see a dearly as any that mere seniority is excuse for placing a man like Reynden in a key position in time of national well. And he has precisely the bitter of pungent gift of speech which is swedded to show up the presenternumser. ed to show up the preposterousness se whole affair.

Curbed Power

Court Restricts Contempt to Vicinity of Courtrooms

Vicinity of Courtrooms

The Supreme Court resterday decryped an abuse which The News has their called attention to — the misuse bentlempt of court powers by judges. The court held that nummary punishments for contempt can be interest for contempt the courtroom. If we alleged offense was committed in the vicinity of the courtroom. If we is genuine obstruction of justice sewhere it must be dealt with under the written criminal statutes and not by its judges arbitrary decision. This is plainly the rule of common time. The contempt of court power, thick is the only instance of arbitrary ower still allowed to judges in a democracy is permissable only because it is recessary to insure that trials shall present in orderly fashion and without inference or intimidation. To extend it is small to open the way for the judge to scorne a tyrant who allows no criticism (filmed).

Brash Claim

But This Sort of Thing Nevertheless Has Its Uses

be most brazen thing which has come of Fascism and Nazism is the cur-ity sammer from Berlin and Rome spitche protectorate catabilished over smland by the United States. Both

remland by the United States. Both seriments are full of moral indignations what they call a cynical violes of international law. And the Natu Soges who make up what is called the missi Government chime in. I serror and tragedy did not march list all this, it would be uproarious seed, it is of course strictly legal, that unables of Denmark by the Nazis, the cut a down saidon. It is of course, with it is of course, that it is of course, and the said of the sa

that the chosen victims of the Nazi at-lack are always women and hables. And of course the submarine stiack without warning is strictly in accord with the Hague Convention. These swine have contemptuously destroyed the whole structure of international law, and now dare—lylingly—to appeal to it when it interfers with their precious schemes for power and loot.

for power and loot.

But there is method in their madness. But there is method in their madness. They judge, and quite correctly, that there are many people in the United States who are willing and eager to listen to them and go around — without having the least notion what they are talking about — yeilping that the Administration is robbing poor Germany and Italy and Denmark of their lawful rights and setting up as an imperialistic land-grabber.

There is only one comfort in the case. The uproar is pretty good evidence as to exactly what Germany did have in mind for Greenland.

blotto to take his medicine before going to bed.

Specifically, what they have done is
to work out a "detoxicant treatment,"
which consists in injecting into the veins
of the patient, large quantities of artificcially-made detoxifying fluids normally
found in the body. The treatment is good
for many things—burns, shock, the reacttion on some people of useful drugs, the
toxemia of pregnancy, etc. But its effect
on the hangover is its most startific
claim to fame. If the bad boy takes it
before he goes to sleep, he "awakens
feeling completely normal."

At least we find as much reported by
the above-sided Associated Press. We do
not vouch for it and carrelly! disclaim
all responsibility in the premises.
But if the thing should turn out to be
true, we shudder to think of the coming

recent weeks the rate has been lar above that average.

The British are building only about 1,000,000 tons a year, thus learing a sharp net depletion which is secentually do by the fact that British ships myst go on ever-tengthening basis. For British net was the constance if the Germans nove fine Africa, and establish themselves on the West Coast around Dakar, British shipping will have to detour toward the coast of South Coast around Dakar, British shipping will have to detour toward the coast of South Coast around Africa. England is now the only effective outpost left in the struggle against Hiter, the only major cenier of resistance. The margin between the war staying in Durope and its coming over here — in economic and political, and eventually perhaps military, form — is daily growing thinner.

HANDS OF PRESIDENT
Yet we face this deepening cruis with a country far from united in the belief that it is of irgent importance to its. We do not yet really believe that the defeat of England would bring us under an oppressive blight. We do not yet see that long before Hiller's hombers and Hiller's though before Hiller's hombers and Hiller's though crossed the Allantic, the hadeful things which this regime means would race across the Allantic shead of him — a militarism as all-embracing as his own, a totalisation conomy which would be necessary in order to carry on such an effort, repression of labor, of free speech, of everything except the business of arming to the teeth. Changes which have taken place thus far are but the beginning of what we should have to do it there were no we should have to do if there were no England and no British fleet standing in
