Forgery?

Good Grief, You Germans, You Flatter Uncle Sam

By implication, official German prop-agandists accuse poor, nalve, innocent Uncle Sam of forgery. They say the United States Government faisified the document proving that Major Belmonte Pabon, Bolivian military attache in Ber-Paton, Bohreim initially attached bellin, conspired with the Nazi minister to Bollyia, Herr Ernst Wendler, to effect a German-inspired coup in the South American republic.

The Nazis are as outraged as only a frustrated gang of criminals can be. All the evidence indicates that after spendthe evidence indicates that after spending thousands of dollars and the efforts of some of their best spies in Bolivia, the Nazis anv their whole plot crumble—largely because Bolivian and American counter-spies, working together, exposed the foul conspiracy. Portunately for all of the Americas, the plot was not quite strong enough to stand sunlight, it willed, and with it the hopes of Nazidom.

"Necessary" Communits

Those who know Lawrence 8 Ross, either personally or by reputation, will certainly not be surprised to learn that the Dies Committee has declared him a Communist. This organizer for the United Furniture Workers of America (CIO) never was, in our opinion, a questionable character. There was no doubt shout 1, he was an out-and-out Communist.

He was sent to Hickory by the UEWA-CIO union to organize new chapters of the union. But, like all other obselfent Communists, his first allegiance was to the Party.

Lawrence S. Ross (or is it Rosenberg?)

Is just another tuen on the bill of inductionent being prepared by the public against the CIO. He is further proof of the charge that many responsible jobs in CIO unions are held by Communists. Publicly, union officials deny this accu-action. They say fascists are trying to smear them. On words fragrant with the Party line!). Privately, Philip Murray of the CIO has admitted that he; sworted because of the Communists in sworted because of the Communists in the case of about it. Communists are so numerois and such capable CIO workers that, iff he fired them, the CIO might crack open.

Led by honest, non-Communist lead-ers, the CIO is not alrong enough to stand. Remove the Reds and—wham!

Such an organization, we submit, is not worth perpetuating if the CIO can't live without Communium, it deserves oblivion.
