Not only did Mr. Dies accuse Parime-lee of Communistic learnings, but, what was worse, of a bellef in nuclium. Yes, air, said the Congressman, Parimetee had written a book 'a suspicious act, in it-self! in which he envisioned a 'nuclist acciety' wherein the series would min-gle nakedly 'in the office, workshop and factory.'

We hadn't the slightlest idea what Gymnosophy was until we looked it up, and we bet Mr. Dies didn't ellher. Anyway, Webster says a Gymnosophy is either (1) a member of a sect founded by Alexander the Great or (2) a nudist. The new Gymnosophy, we fear without being able to lay our hands on a copy of the book, might be nudim.

## 100 Ships

U. S. Had To Lose That Many Before Learning a Lesson

Today the score of American ships sunk by Axis submarines in the Atlantic stands at an even 100. That is the official taily based on announced sinkings. Since the announcementa usually come a few days after a sinking, and dince there has been on indication of a let-up in U-boat activity, the actual figure is probably well over \$100.

the actual figure is probably well over 100.

The United States has been at war 120 days, and in one ocean alone we have lost them by two and three and fours. We cannot continue to have float such as a few and fours, we cannot continue to have them at such a rate. If we do, we shall not win the wer in this decade.

If would be unfair to say that the Government in Washington does not comprehend the gravity of the steady drain on our chipping. The Government Expows far better than any private civiliant what we cannot afford to love. But has dovernment is a ponderous thing. It moves like a glacifer—sinost lunger-espitibly. This country is learning how to fight the war as it goes along. It is the hard way, but apparently it is the only hope and pray that the terribble leasure with the learned quickly and that, once they are learned the nervole between they are learned, the period between diag-nosis and treatment will be shortened. It must be shortened.

## No Mere Job

County Solicitorship Needs A Man of Character

A Man of Character

The County Commissioners should know as well as anybody the absurdity of treating the solicitorship of County Recorder's Court as though it were no more than any \$200-a-month job. This lower court is a prime point of contact between the people and the law, and on the manner in which it is conducted a great deal depends.

Inaxmuch as the recorder can only sit in Judgment, the solicitor of this court determines to a large extent what sort of court it shall be. The present Board of County Commissioners has had experience with two solicitors—one who perfeture with two solicitors—one who

of County Commissioners has had experience with two solicitors—one who made a discreditable both of the Job; another, Ed Stukes, who measured up in every particular and whose aervices elearly showed how easential is character in a position of public trust.

To take the place of Mr. Blukes, Armytomed, the Commissioners have underconsideration several applicants and political satellites about some of whom The News would prefer, in kindness, not comment. But it must be obvious to the Commissioners from their previous and experience that the solicitorship resulters a man well versed in the law, quites a man well versed in the law, quites a man well versed in the law, and experience that the addictorship re-quites a man well versed in the law, aggressive, strictly honorable and pos-essed of a quality which we shall call balance. Buth a man or men are available for the place. Let one of them, rather than some n'er-do-well, be given it.

Last week two Negroes, both confessed plans, were released by Superior Court without being required to put up bail. They were freed by means of the familiar "prayer for judgment," which in many instances has proved to be equivalent to a nollegras. They told the Solietor they intended to join the Army and he let them go.

It would be hard for Mr. Carponter to prove that he didn't know better.
