

Mr. Little Fellow Can Buy War Bonds Which Pay Best Interest

WASHINGTON (AP)—Uncle Sam is asking Americans to buy \$100,000 worth of war bonds by the drive started today. — has read them so the little fellow sees the obvious cut.

In this drive some bonds pay higher interest rates than others. Mr. Little Fellow can buy those which pay the highest interest although the number he can purchase is limited. Organizations like banks are offered bonds which pay less than the highest interest.

Here's the way the Government seasons in making those top-interest bonds attractive to the average wage earner.

It's a good inducement to get the surplus spending money out of circulation and thus help prevent inflation.

That idle money in wartime, when goods are scarce, worries the Government. If people used that idle money to buy bonds against one another, they might cause higher prices and therefore higher living costs.

Here is a roundup of the bonds: how they are being sold, how much they cost, what they are worth, and who can buy them:

Series E—the most widely sold bond in America, it is called the people's bond, and is intended to meet the needs of the small investor. Banks can't buy it.

It is issued at purchase prices of \$1.75, \$7.50, \$75, \$375, and \$1,875. If you hold them for ten years—the maturity date—you will receive, respectively, \$50, \$500, \$5,000, and \$18,750.

No one person may buy more than \$5,000 maturity value (\$3,000 purchase price) in any one calendar year, although additional purchases in co-ownership are permitted in certain cases.

For every \$3 invested in Series E bonds, you receive \$4 at the end of ten years. The interest on them is equivalent to 2.9 per cent compounded semi-annually if held until the maturity date ten years hence.

NOT NEGOTIABLE

Owners may redeem the bonds 90 days from the date of issue which is the first day of the month in which they are bought. They cannot be used as collateral for loans and are not negotiable.

Series F—Intended for larger investors, this is a longer term bond than Series E. Its maturity date is twelve years from the purchase date. In other words, the Series F has earned its full interest at the end of ten years, Series F at the end of twelve.

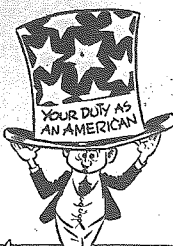

That interest rate on Series F is 2.5 per cent annually if held to maturity.

It is issued in denominations of \$5, \$10, \$50, \$100, \$500, and \$1,000 (maturity value), or \$18.50 to \$1,400 (purchase price).

No one purchaser may hold more than \$100,000 (purchase price) of these Series F bonds or a combination of Series F and Series G (later explained below) in any one calendar year.

This bond can be redeemed at fixed amounts on the first of any month, six months after issue date upon one month's written notice.

Series F can be bought by individuals, trustees, partnerships, associations, and by corporations except banks that accept demand deposits.

ARE YOU DOING ALL YOU CAN TO BUY MORE BONDS?

The \$18.50 series F bonds—worth \$25 when they mature—were intended particularly for investment by small groups, such as clubs and school groups.

Series G—This bond, like Series F, matures in twelve years and is issued in denominations of \$100, \$500, \$1,000, \$5,000, and \$10,000. It bears interest at the rate of 2 1/2 per cent a year. The Treasury pays the interest semi-annually by check. Series G is what is known as a current income bond—the value of the bond itself doesn't increase but interest is paid on it as in an ordinary long-term loan.

Series G BONDS

Series G bonds may be redeemed prior to maturity at set rates which are less than the face value of the bond. The same investors are eligible as for F bonds. No one purchaser may hold more than \$100,000 worth of F and G bonds combined.

Series G bonds—like Series E—are not negotiable and can't be used for collateral.

Tax savings notes of Series G. These are issued at par in \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 denominations.

By buying these bonds, big income-earners can set aside money for tax purposes in a short term investment that yields 1.07 per cent interest annually if held to the end of the maturity period—three years from date of purchase.

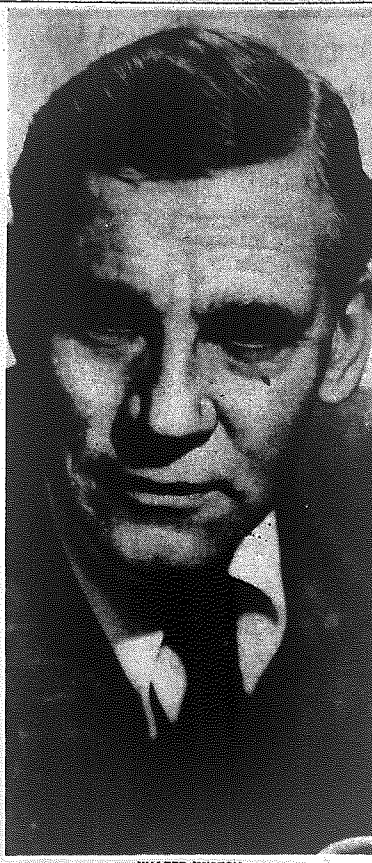

The interest, of course, is less if redeemed for cash or offered in payment of taxes at dates before maturity. They may be redeemed at par and accrued interest after six months from the purchase date upon 30 days' notice.

These Series G bonds may be used as collateral for loans from banks only. They may be bought in unlimited amounts—thus differing from Series E, F and G bonds—by any individual, or bank, corporation or other organization or group.

The Treasury points out that these notes will reduce future tax liability. A \$1,000 return as long as the money remains invested, up to maturity.

Treasury certificates of indebtedness—commercial banks can buy these certificates for their own account for the first three days of the drive, April 12-13-14. Investors of all other classes can buy them thereafter for the entire period of the drive.

The certificates are dated April 15, 1943, and pay 7-8 per cent interest.

WALTER HUSTON Hollywood

Film Stars--And How They Got That Way

By ERSKINE JOHNSON (Hollywood (INEA))—This is the story of a broken leg and how it turned a messenger boy into a film star. He was a newspaper reporter in St. Paul, Minn.—a newspaper reporter with a wild dream that he wanted to be a film actor. So he saved a few dollars, went to Hollywood and made the rounds of the studios. No, they did not need any actors. He heard that from every casting director in town. His money soon gave out and he went to work as a messenger boy, making deliveries for a film laboratory on a motorcycle. Then one morning just as he turned into a street adjoining the Paramount studio casting office, there was a sickening crash as his motorcycle collided with an automobile.

He was carried inside, unconscious, with a broken leg. The casting director called a doctor. A month later, when he had recovered, the boy called the casting director, who gave him a small role in a new film. The small role led to bigger roles and stardom. Today, 22 years later, the boy is still under contract to Paramount studio—still a star. His name—Richard Arlen.

VIA SHAKESPEARE

He had been stage acting, with no-much success, since early youth. Then one day came a small role with the great Mantell in "Othello." Somehow he muffed a cue and ruined Othello's death scene. Mantell didn't exactly fire him when the show was over. Instead, he said:

"Young man, you should go into vaudeville. You can make mistakes in vaudeville but you can't make them in the theatre. Because vaudeville itself is a mistake."

The young man, who had studied to be an electrical engineer, gave up the stage, settled down in the Middle West and for eight years worked usefully and profitably on lighting and power contracts.

Then in Kansas City one day he attended an electric performance at a convention of electricians. The show was to be "Hamlet," the star of all people, Mantell. But Mantell's train was late, the audience was noisy impatient. The young man held a hurried conference with the entertainment committee, then strode on the stage replacing the great Mantell in the role of the gloomy Dane.

He's been acting professionally ever since. Today he's one of the screen's great character stars, listed on the Warner Studio roster as Walter Huston.

Commissioners Move To Curb Stray Dogs

Board Gets Report of Numbers of People In County Having Been Bitten

After hearing several reports of stray dogs biting children and adults in widely scattered areas of the county, the County Commissioners today authorized their chairman, Sid McAden, to employ an assistant dog catcher for the summer months and to use newspaper advertising as a means of warning citizens against stray dogs and advising dog owners to have their animals inoculated against rabies.

Chairman McAden said a large number of reports of biting dogs had been received in his office in recent days. One such report was that dogs had bitten fourteen persons in the Derita section.

WILL USE THE NEWS

Mr. McAden was authorized to use The Charlotte News and The Mecklenburg Times as advertising medium.

Health G. Mack Hilly asked the Commissioners to approve the appointment of L. D. Campbell of the Derita section as a special deputy sheriff in order to permit him to carry a pistol with which to kill stray dogs. Arthur Goodman, president of the Mecklenburg Humane Society, opposed the shooting of stray dogs.

Mr. Goodman contended that killing a dog when it bites someone does little good and may often do much harm.

"It is almost impossible to determine whether a dog has rabies in such cases," said Mr. Goodman. "It is far better to confine the dog for about ten days. If he grows weaker and his legs become paralyzed then it is almost certain he has rabies and the person bitten can be treated in time. It is a mistake to shoot dogs before you pen them up."

The Commissioners inquired about the State Rabies Law and were told that it requires dog owners to have their dogs inoculated against rabies between April 1 and July 1 and that one fault in the law is that no legal action may be taken against a dog or its owner until after July 1.

"People get panicky about dogs this time of year," said Mr. Goodman, "because this is the breeding season and dogs are more inclined to bite now than they were last winter. Not all biting dogs are mad, but they ought to be penned up for observation."

The Commissioners did not approve the appointment of the special deputy, but advised Mr. Campbell that he could legally carry a pistol, provided he does not carry it so that it is concealed.

Air express transported last year by the nation's commercial airlines broke all records for number of shipments, weight and revenue.

Painful NEURALGIA

BC Eases Pain Soothes Nerves!

Ease neuralgia pain, and soothe nerves that such pains upset, with quick-acting "BC." Also relieves headache, muscular aches and functional periodic pains. Use only directed. Consult a physician when pains persist. 10c and 25c sizes.

WANTED! TECHNICAL MEN

For The Corps Of Engineers. United States Army

"This is a challenge to men who want to help engineer the forthcoming American victory—who want to get this war over with in a hurry."

This vital branch of the United States Army is in need of trained and experienced technical men and engineers between the ages of 18 and 37 for overseas service.

FOLLOWING CLASSIFICATIONS ARE NEEDED:

Automobile Mechanic	Rigger	Jackhammer Operator
Blastman or Powderman	Section Foreman, Rail-way	Filter Operator, Water Supply
Bridge Builder	Sheet Metal Worker	Machinist
Carpenter, Construction	Water Supply Foreman	Tractor Driver
Construction Foreman	Well Driller	Tractor Mechanic
Electrician	Motorboat Operator	Operator of Heavy Construction Equip.
Utility Repairman	Lumberjack	
Quarryman		

Technical Ratings in All Grades Are Open in These Fields With Exceptional Opportunities For Advancement.

Qualified Men Will Be Urged To Apply For Officers' Candidate School in The Corps of Engineers, U. S. Army

IF YOU HAVE HAD EXPERIENCE OR TRAINING IN ANY OF THE ABOVE FIELDS, YOU ARE URGED TO CONSULT THE UNITED STATES ENGINEERS' OFFICES LISTED BELOW:

Charlotte Regional Engineers 2140 S. Blvd. Charlotte, N. C. Monday Thru Friday	Area Engineers' Office Camp Sutton Monroe, N. C. Saturdays Only
U. S. Engineers' Office Camp Mackall Hoffman, N. C.	Area Engineers' Office Fort Jackson Columbia, S. C.

OR THE NEAREST ARMY ENGINEERS' OFFICE

It's Great to know You're Helping!

What's Our Homework? What Time Is It? Let's Go To The Show! Didja Hear About Jack?

"SURE, I know I'm too young to carry a gun and be a Ranger like brother Bill, but I'm helping all the same in every way I know how. Dad told me the other night about the need for cutting down my local 'phone calls. He said that every telephone line was needed so badly by Uncle Sam that every call I didn't make would be helping win the war.

"Gee, I didn't know my calls would make any difference, but they sure do. Dad says telephone lines and switchboards are so crowded now that every call I make, to be dead sure it's important.

"Mom and Dad, and Sister and the maid, and the whole gang of kids in my neighborhood are now doing a lot less telephoning. Believe me, I want brother Bill back home, and if cutting down on my 'phone calls will help bring him back—it's sure okay with me.

"How about you? Will you help, too? I bet you will."
