No Hurry

We keep a file of news stories and such :like about the "City Police De-partment." It's a fairly fat folder, even though not long ago we thinned it out and, threw away all the stuff more than ten years old.

partment." It's a fairly fai folder, even though not long ago we thinned it out and three waws all the stuff more than ten years old.

It would be, we believe, an ealightening experience for a City Council, controlled with the responsibility of naming a police chief to take a look at some of the stories in this folder. What they add up to unmistakebly, is this: that when you have a police chief selected by the method of shutting your eyes and counting ensy-meeny-miny-more choosing the man the count comes out on, you have at least an inefficient department at worst an undisciplined and disorganized department.

For example, here's a headline from 1941 when Joyner was chief: "FLACK AND COURCILIMEN ON CARPET-JUDGE PLESS CALLS THEM INTO COURT." What happened was that a police officer, supposed to testify in, acase in Superior Court, couldn't be found for 24 hours. Judge Pless cailed in Mr. Flack and the Council's Police Committee and asked 'em what kind of Police Department this city had, anyhow?

Go back a little further, when Pittman was chief. Here is an except from an editorial in The News of August 16, 1985; "It is clear that under the direction of Chief Pittman ...; the Police Department than ever been organized to its full effectiveness and has neverextwhisted the discipline which recent wents (a disgraceful builtying expedition into the Negro districts) have showed it to need."

The News of discipline which recent wents (a disgraceful builtying expedition into the Negro districts) have showed it to need."

The News of discipline and in the department during the years that so-so men were in charge. Yet at the time Anderson was made chief, the record chainers in the police Department when the proper of the same, the record of dissension and lack of direction in the Negro districts have showed it to need."

The News had a police officers was begun! There was no more fumpy business. Almost at once, the Police Department spined both in public respect and in respect for itself, all because a City Council had look

had found him.

-The News has no desire to name the next police chief, but it makes bold to predict that unless the Council sets out to get the best possible man, it can find, it will have the Police Department in its lap again.

Hot, Ain't It?

Hot, Ain't It?

J. M. Howe, ineteorologist, has a profeestonal reputation without beimish.
Oh, we've caught him suggesting thimder showers on day after sultry day,
when the earth remained as dry as a
WCTU social. Zeke Henderson presiding, But those little things can happen
to anyone. You can't hoe-tile weather,
and a bum guess is no blot on the battered escutcheon of any meteorologist.
Thus we hesistate to challenge Mr.
Howe's veractiv—and we won't, except
obliquely. What we'd like to know, as
qualified operatives of the Ivory Towe
Observatory, is just how Mr. Howe manged to tamper with vesterday's thermomeler. He reported a temperature
of just 102 the even number suggests
he doctored the report), and said casuality that the reading was taken at the
airport. We want him to brace up and
confess to-chicanery. It was a sight hotter'n that where we were— and everywhere we went.

In the Tower we've had a double staff
on duty stope early on the morning

where we went.

In the Tower we've had a double staff
on duty since early on the morning of
June 21 (and paying overtime, too.)
When the Summer solstice hit us, the
whole caboodle was at battle stations,
idding with the instruments. And at fiddling with the instruments. And at the moment when the sun crased to recede from the equator, in the first degree of Caneer, our records started algorocketing. Oh, we do it scientificalities, and on no such catch-as-catch-can basis as Unite Sam Javors while Mr. Howe was pering into his refugerated compartment to great off 102 degrees we were measuring the sam assam.

Mean distance (miles)	2,300,000
Eo hor, parallax	
Density (water 1)	
Mass (carth 1)	332 200
Diameter (miles)	666 400
Gravity (earth out)	27.65

By yesterday, we had the temperature penced. Actually, it was 110.6 live are oldock in the mornion. And by the P. M. when Mr. Howe took his high reading it was 2021, a record for any five or look of the work. And our morths were included unknown to history.

ods, which are not dependent at all upon-unreliable mercury, are based upon the specific flavily of hard cider, and its evaporation from the body under a shade tree, the observer maintaining complete quick. And we're calling for an investigation of Mr. Howe.

Senator Homer Capehart, the Indiana Republican who makes fine phonographs and sporfs a reputation as an isolationist, is not an ally. He is so far off the track that he picked the very moment when his colleagues were, urging immediate ratification of the United Nations Charter to propose peace with Japan.

The Senator wasn't too specific, but he disclosed that Japanese peace offers made in the past several weeks were "acceptable to me personally." He was not at liberty to divulge the proposed terms from Nippon, he said, but he hinted strongly when he said.

"If the Japanese promised to give

d strongly when he sald:
"If the Japanese promised to give
up all territory they have conquered, including Manchuria, wouldn't
that be all right?"
It may be all right with Senator Capecett and to some randing groups like

that be all right?"

It may be all right with Senator Capehart, and to some rag-tag groups like America First, but it won't be all right with most Americans. There was never excuse for such isolationist chatter during the war with Germany, but even that sounded more reasonable than Senator Capehart's suggestion. We've no idea how he happened to forcet Pearl Harbor, or to overlook the rawages of the Philippines, Wake, Guam, the Indies and Malaya.

He wants to settle, for the price of American lives yet to be sawrified in the war on Japan, it does not enter this mind that we must erush Japan's political and military power manifestic, if we are to know the second of the price of the price

Down To Business

Now we're beginning to get somewhere in Germany. Our army of occupation has al least one "execution team"—two U. S. soldiers who specialize in hangings, Appointed by SHAEP, it is their business to four our portion of German withins who tour our portion of German civilians who have been sentenced to death for crimes against American forces. Vesterday there was word that this team had executed three Germans for the nurrier of a U. S. flyer who had parachuted from a burning homber. The simman was tilled with chibs and pitchforks by civilians, and these have met a just fate.

This brought to 70 the number of

these have not a just fate.

This brought to 70 the number of hampings performed by these two and-diers, and though it is a pristy business, we suspect they must enjoy such tasks as they had yesterday. It is likely that housands of GTs ensy them their job of dealing out justice to criminals they have known. It is reassuring to see the Army going about this bloody job so effectively, and without fanfare. Yesterday's little job, in fact, was the first mention we've seen of the program of execution. execution.

execution.

The policy won't care for the bulk of Germany's war criminals, to be sure. Most of them, even though they are patently guilty, must stand before the Allied War Grimes Commission, which is scarcely getting underway. At last report, little more than a month ago, the commission and only 2,000 German and the commission and only 2,000 German. the commission had only 3,000 German names on the black list-mot one of them advanced by American members. So the prominent criminals of war are not yet in danger of the hangman's trope 1 is only the small fry, the Germans who have been so foolish and vindeties to cummit crimes since American invasion.

can invasion. We'd be happy to see the War Crimes Commission give the word, to Supreme Bradiquaters to turn its use execution team fonce on its list of prospects, and have the old done with, We're still persuaded that many of the criminals are roug to get away, both large and small, but to long as the Army is taking its till, partial matter is being done.
