## Washing Again Passfooting On The Franco Issue

By HAROLD I. ICKES  
Former Secretary of the Interior

Milk toast diplomacy will not serve the interests of the United States any better in the future than it has in the past. I have a deep conviction that the only chance for future peace and security in the world lies in the United Nations. But the United Nations, in my opinion, will have to do more than it does now in order to seem willing to do with respect to Spain if it is even to approach a realization of the hopes of those who love peace.

An accessory before the fact is indictable and punishable under the law. In view of the comfort that Franco indisputably gave Hitler, Franco is an accessory before the fact in the only addition he has as a receiver of stolen goods. If he is to be allowed to continue to live in the United States, he should be given the same treatment as Hitler, Mussolini and Goebbels. In my opinion, we have to do more than we are now doing to seem willing to do with respect to Spain if it is even to approach a realization of the hopes of those who love peace.
