EVER GET ASTROPHOBIA?

Do you suffer from astrophobia? That's a morbid fear of thunderstorms. If so, here are some facts that will put your mind at rest: Thunder is merely electricity, and never hurts anything. It is only a sound that you hear the thunder. The lightning has already struck; if a lightning bolt should strike you, you'd never hear it thunder. Lightning kills only about three persons in every million, each year. That makes it considerably less lethal than the common house fly, and compared to the automobile, almost a pit-tying for children.
