### FIREMEN DUE FAIRNESS, NOT FAVORITISM

FIREMEN DUE FAIRNESS,

APPARENTLY the Charlotte firmen
want to have their cake and eat it, too.
Eaced with the grim fact that their special
retirement system is heading for bankruptey,
the only suggestion a spokesman for the fireman advanced was that the city (i. e., the
taxpayers) increase its contribution from 5
per cent of the firment's salary to 12<sup>3</sup>per cent—and keep it at that I for an
We doubt that the taxpayers of Charlotte
will buy that idea, nor should they.
The facts are not in dispate. The firemen
contribute 5 per cent of their pay to the
retirement fund; the City matches that with
another 5 per cent. Yet the benefits offered
are so generous that nothing less than a total
contribution of 17½ per cent will put the
fund on a sound actuarial basis.
Unmindful of the plight of the taxpayer
and unconcerned over the precedent it would
set for other public employees. City and

United Appeal, then, offers a way to free everyone—donor, solicitor, agency, and community—from the confusion, exasperation, duplication, and uncertainty of unorganized

United Appeal has come about in Charlotte and Mccklenburg County because the people believed it essential to bring order out of chaos if all agencies were not to suffer.

Many persons have participated in the lead-ership of the United Appeal movement. To name a few would be to deny others the credit due them.

But United Appeal will succeed only if it has the enthusiastic co-operation of all the people of the community.

people of the community.

Today marks the opening of the drive.
The goal of \$738,000 is a long distance away.
It will be achieved, however, as indeed it must be achieved, if the people of Charlotte and Mccklenburg County show the same generosity that has always been their trademark.

present level, and scale down the benefits until the fund is actuarially sound.

2. If the firmen want a fancier retirement plan than other City employees have, increase their contribution from 5 per cent to 12½ per cent and leave the City's at 5 per cent.

3. Abolish the special system, and put the firmen under the City's regular retirement program.

firemen under the City's regular retirement program.

Neither of these alternatives will find favor among the firemen, who have a good thing, and know it, and don't want anyone to take it way.

The firemen plead special hazards. The lot of the paliceman is hazards with the consideration extra income from special fund-raising events. Such tunds have no place in a retirement system. They are neither predictable nor permanent. There is nothing to prevent the firemen from using extra funds as annual dividends to men on the retirement rolls.

The people want to be fair with the firemen, but they expect the firemen, in turn, to be fair with them.

And fairness means fairness. It does not mean favortism.

ONE aspect of continued one-party pre-dominance in either North or South, is pointed up by an analysis of Congressis of Congressis ommittee chairmanships. Congression a l Quarterly recently listed potential Democrati-ic or Republican chairmen in the House of assed potential Democratics and the Assessment of the Assessment o

Three Middle Atlantic states will control

A New England state will control one.

If, however, the Democrats retain control of the House:

Six Southern states will control nine of the 19 committees.

Three Middle Atlantic States will have four. Three central states will have four. One border state will have one. One Western state will have one. Thus, with the Democrats in power, the South will have almost half of the powerful chairmanships. If, however, the Republikians gain control, the South will have no chairmen at all, while the Midwest will take over about two-thirds of them.

Because Southern Democrats have controlled these key committees, they have been a powerful influence toward passage of legislation acceptable to the South. This of course a standard, and weighty, argument of Southern Democrats.

off-overlooked argument on the other is just as true. It is this—if and when the Republicans win control of the House, the South will be without representation

among the chairmen simply because it hasn't produced real Republicans (that is, the kind who get elected.)

The South—and the rock-ribbed Republican areas up North—could profit from the advice of old Cervantes, who thought it "the part of a wise man to keep himself today for to-
