and simply lined the rain-swept streets will never be known.

Capit. Patrick Flynn, chief of detectives, estimated the horde at a million and a half. The figure appeared greatly exaggerated in any case. It was a great show.

WASHINGTON (AP) — Americans with a presidential preference could find a poll to suit their tastes Saturday, whether their choice was Richard M. Nixon or John F. Kennedy.

Professional polls, newspaper polls, college campus polls and miscellaneous other straw vote polls showed varying results through the election night in only three days away.

POLLSTER Elmo Roper headed into the final pre-election weekend with a conclusion, "There's not a clear lead for either candidate."

Roper's latest figures, from Oct. 24 national survey, showed 46.5 per cent for Republican Nixon, 44.5 per cent for Democrat Kennedy and 8.4 per cent undecided. But a closer analysis of the undecided vote gave this revised picture: Kennedy 48.5 per cent, Nixon 42.5 per cent, undecided 4 per cent.

"The 4 per cent undecided could make a difference in the election, either way," Roper added.

KENNEDY boosters could take cheer from George Gallup's recent report that "the dramatic shift" toward the Democratic side in the campaign home-state Gallup said his latest nationwide poll, tabulated from Oct. 20-26 interviews, indicated that of these likely to vote and showing preference, 43 per cent picked Kennedy and 47 per cent Nixon compared with a 50-50 split found in an early October national survey.

Surveys published by three national magazines this week found Kennedy ahead. Time magazine's correspondents figured Kennedy was leading in states with 306 electoral votes. Nixon in states with 186. Needed to win: 269.

NEWSWEEK said 50 top Washington correspondents predicted Kennedy would win compared with forecasting a Nixon victory. It said political experts in 50 states estimated Kennedy would get 270 electoral votes, Nixon 190 and 100 within 20 feet of Kennedy's open convertible.
