HISTORIC SCHOOL RULING BEFORE COURT

IN WASHINGTON today, in the quiet dignity of the U. S. Supreme Court building, some of the ablest lawyers of this age will begin their arguments for and against segregation in public education.

In North Carolina, fortunately, wiser counsel has prevailed. The Governor, the members of the General Assembly, the officials of the State Board of Education all have followed a policy of watchful waiting.

This has been the right course, there will be time enough, if the court abandons the "separate but equal" doctrine, to bring whatever may seem advisable about public education. And if the court denies the plaintiffs, watchful effort will have been avoided.
