FOR A SOLOMON, A TEASER

AS A GENERAL RULE, we have plenty and colliseum at this time, when other needs of a dayie to offer iour local officials, are so pressing?

and we make no charge for the service But the puzzler posed by the high construction cost of the auditorium-cost ends to the surface But the puzzler posed by the high construction cost of the auditorium-cost ends to suppose the puzzler posed by the high construction cost of the auditorium be built and competing to the surface and the colliseum for could the colliseum be put up now, and the two buildings. It's probably a cool million collises than a finished job on the structures, including seats, stage and sound equipment, furniture and carpeting, particular, but the colliseum, air conditioning, connecting walkways, roads walks, it ce rink, and landscaping.

Where do we go from here?

Should the commission and the Council go ahead and let the contract for the shells of both buildings, and trust to expediency to get approval from the people for another binding of the support any resonable plan to dig up the money to complete the auditorium and the colliseum.

But if a choice has to be made between the wo, and if a choice can legally be made, the wo, and if a choice has to be made between the puzzler and the contract for the shells of the building and the support any resonable plan to dig up the money to complete the auditorium and the contract for the shells of the building and the support any resonable plan to dig up the money to complete the auditorium and the contract for the shells of the building and the support any resonable plan to dig up the money to complete the auditorium and the suditorium an

WE'RE FOR S. B. 105, BUT . . .

POR SEVERAL MONTHS Governor Dewey its advocates. Governor Dewey's recent moterists to be financially responsible, before they register their automobiles. It carolinas Even under the security system should be impressed upon North appears now that the battle has been lost, at least for this year. In New York, and the governor Twenty five thousand uninsured motorists are involved in reported accidents in the

at least for this year.

This New York battle is of particular interest to North Carolina. This is because New York has been operating for seven and years under the "security" system of auto liability insurance, which is proposed for North Carolina under 8. B. 105, now resting

This New York battle is of particular interest to North Carolina. This is because the North Carolina This is because the North Carolina This is because the North Carolina the New York has been operating for several years under the "security" system of auto liability insurance, which is proposed for North Carolina under S. B. 105, now resting committee.

The main difference between the present New York law and Devey's proposal is this The security system requires a motorist to finature offer accidents, the universal system proposed by Dewey requires insurance proposed by Dewey requires insurance and possibly impoversibled. There is no not not seen to the difference of the difference proposal is this The security system requires a motorist to drive a car, and no one has a being the through the proposal to the control of the difference of the difference proposal is this of the difference proposal to the control of the difference proposal to th

lability insurance.

If the Legislature cares a whit for North larolina traffic victims, it will pass S. B. 105. This bill would at least increase the number of financially responsible drivers. But be-ause the advantages, and not the faults, of he security system have been presented by

for the consequences."

We concur in the governor's view The security system, if adopted in North Carolina, will be a much needed improvement in our state. But the final and fair answer is financial responsibility of all motorists. That objective must be kept in mind while the state works for the partial solution, the security system.

IN THIS OR ANY OTHER YEAR

W Odum.
The late J. W. Cash made several references to Dr. Odum in his Mind of the South.
"At the University of North Carolina,
Odum and his associates used has RupertVance were carrying out with the aid of
studies which was to culminate in the publication of 'Southern Regions in the United
States'.

States out of Chapel Hill and all the leaser content which followed Odum's lead, numbers of young men and women were going out through the schools of the South to hand on and expand the new attitude in ever-widening circles."

If a scholar's importance may be measured.

COME YEARS AGO a writer described the ing. The young undergraduates who studied to casis of cultures in the Sahara of the South.

It was a happy phrase, and an apt description. And if we may returned the metaphor and pursue it, one of the more abundant seatern topics. ... these and others by the and pursue it, one of the more abundant work. Knowing him has influenced their the state of the countries thousands have come to know somewhat the countries thousands have come to know some the countries thousands have come to know some the countries thousands have come to know some thousand of his ideas and of his work. Knowing him has influenced their initial countries that the countries thousands have come to know some to know the countries thousands have come to know some to know the countries thousands have come to know some to know som

of a whole region has been shaped. Howard Odium has been a great student and a great teacher because of his instatible curiosity, his persistence, and his tremendous expactly for sorting information and storing it in his mind. On Sanday nith. at Greenbeen, he scieves the O. Max Gardner of the control of the curious of the control of the curious of the curious control of the current echolastic year. It is a measure of Odium's deservingness that the award could, have been given him, with equal justification, in any number of previous years.

THE TONIC OF THE OPEN ROAD

Done with indoor complaints, libraries, querulous criticisms, Strong and content I travel the open road.

THE OPEN ROAD—that was the tonic Walt Whitman recommended. As a newsman, as well as a poet, Whitman realized the beneficial effect of desultory travel

investment as went as poort withintan reast intended to beneficial effect of desilitory travel of the beaten path to his own of-desilitory represented. After a week following mention to the travel control of the second of the

and palmetto bordered by Australian pines growing from the black earth of the Ever-glades, whose silence is broken only by the whirring wings of thousands of swamp birds, the occisional croak of a frog or splash of a 'gator. He can find it, after bastening out of the fleshpots of southern Florida, along the 'gator. He can find it, after hastening out of the fleshpots of southern Florids, along the sea-west Buccanser trail up the state's east coast. And he can find it along the poor but passable red roads of Georgia and through the heart of South Carolina's mid-state farm-lands where the farmer, leaning on his crude walking plow and watching the playful jet fighters overhead, brings home to the trav-eler the fact that one does not have to go abroad to note heart-rending disparity in scientific advancement.

ascentize asvancement.

As the traveler heads northward from the southern peninsula, the open road is fringed first by the bougainvilles and hibiscus, then the exmellia, in all its fragrance, and finally the azales, now bursting into full bloom in the Carolina gardens. And the traveler returns, reassured that the open road, to those who will seek it out, still has its tonic effect.

And how about a "truth detector" test for Senator McCarthy?
