

A Couple Is Trapped....

A TRACTOR-TRAILER unit went out of control on an icy highway near Ottumwa, Iowa, and Mr. and Mrs. William Simmons were trapped inside the cab for two hours. (AP).

Baptist Resolution

Liquor Action Left To Board

ASHEVILLE (AP)—North Carolina Baptists went on record today as favoring a statewide liquor referendum, but left the matter of implementing it to their General Board which meets in January.

Chinese Free 3 Americans

LONDON (AP)—Red China ordered today the release and deportation of three imprisoned Americans, Peiping radio said.

A broadcast heard here, identified the Americans as Mrs. Homer V. Bradshaw, Marcellus Waite and Justin Garvey.

Mrs. Bradshaw was imprisoned with her husband in March 1952. Dr. Bradshaw, a member of the Third Presbyterian church of Pittsburgh, and his wife both were medical missionaries.

The Rev. Marcellus White, 46, of Wallham, Mass., was serving in 1923 just before going to China. He studied at the Passionist Seminary at Dunkirk, N.Y., and was ordained in 1924.

The Rev. Justin Garvey, 40, of Union City, N.J., was sent to China by the Passionist order in 1946 to serve as a missionary. He was arrested in December 1951.

Billy Graham Has Recommendation

LONDON (AP)—"A little lightning, thunder and rain" is recommended for religious sermons by Evangelist Billy Graham, who says the average religious intelligence of the world is 12 years and that most sermons are over listeners' heads.

Graham spoke to about 200 here yesterday at the Church of England Assembly, a church parliament which represents a cross-section of Anglican clergy and laity.

Korea Threatens Japanese Boats

SEOUL (AP)—South Korea threatened today to shoot at "and if necessary sink" Japanese boats if they persist in violating the Syngman Rhee line.

This is a zone extending up to 75 miles from the Korean coast. President Syngman Rhee reserved it exclusively to South Korea in a proclamation when Japan regained its independence. South Korea naval craft seize Japanese fishermen who venture inside.

No Interference

PHILADELPHIA (AP)—A Ford Motor Co. official said today that Ford's supplemental unemployment benefit plan fills a need for more protection to laid-off workers without interfering with state unemployment compensation systems.

Arctic Blasts Sweep Across Northern States

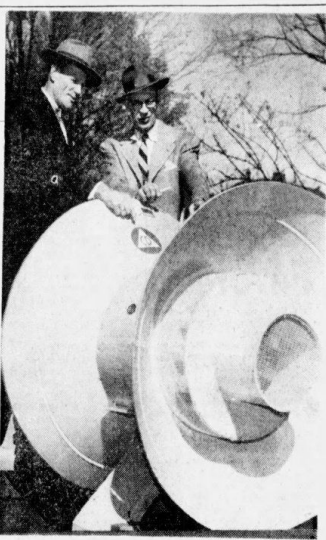

President Checked Ike's Progress Most Satisfactory

GETTYSBURG, Pa. (AP)—President Eisenhower's doctors gave him a complete checkup today, and reported he is progressing "most satisfactorily" toward recovery from his Sept. 24 heart attack.

And one of the President's visitors of the day—Secretary of Commerce Weeks, who had an attack of angina pectoris 12 years ago—told reporters: "I feel sure the President is going to be as good as new."

A medical bulletin from Col. Thomas W. Mattingly, chief of heart services at Walter Reed Army Hospital in Washington and Maj. Gen. Howard W. Snyder, Eisenhower's personal doctor, said that the President's gradual increase in activity "has resulted in no signs of fatigue or symptoms."

The text of the bulletin: "The President's medical examinations this morning show his pulse and blood pressure continue to be normal. His cardiogram shows the expected progressive evolution. His prothrombin (blood clotting) time is un-

IF YOU THOUGHT it must have taken a mighty big siren to make all that noise yesterday, you were right. And here is a picture of the noise-maker as it was being tested here by Deputy Fire Chief Walter Black (left) who heads the Civil Defense activities in the fire department, and Ray F. Greving, an engineer for the company who sent the siren for a demonstration. Civil Defense Director Charles E. Cullen said six sirens such as the one demonstrated yesterday will be bought to be located in the city.

.... And Then Rescued

FINALLY, rescuers removed the top of the truck cab, and there sat Mr. Simmons practically surrounded by the steering wheel. (AP).

Polio Outbreak Under Control

HAVELOCK (AP)—A mild outbreak of polio in the Havelock Cherry Point Marine Air Station area is reported under control.

Eighteen cases were reported, 15 of them in a two-week period beginning Oct. 15. No new cases have been diagnosed in the last 10 days, however.

Gene Smith, editor and publisher of the Havelock Progress, said inoculation with gamma globulin of about 4,000 children under 15 years of age, and of expectant mothers, is credited with checking the spread of the disease.

Capt. G. B. Ribble, senior medical officer at Cherry Point, said all but one case is considered mild. He attributed this to the fact that most of the children in the area had completed a series of Salk vaccine shots. Among those children, he said, there was no paralytic polio.

The first inoculations with gamma globulin were given Oct. 26-27, and the others Nov. 4-5. The gamma globulin was provided by the National Foundation for Infantile Paralysis and was administered on a nonmilitary basis.

What's Inside

The story of how a fancy doll managed to help a down-and-out is told today by Helen Worden Erskine, The News' new columnist. The story is on page 1A.

WARILY INCHING AWAY from an air duct — the one she toppled through Monday — is tiny Joy Ellen McAllen, daughter of Mr. and Mrs. Milton McAllen, of Erie, Pa. Although she fell seven feet, the child emerged without a scratch. (AP Wirephoto).

Cold Wave Moves Into Southland

By THE ASSOCIATED PRESS
A cold wave with biting wind and blinding snow in some areas, swept across the northern part of the nation today.

Winds sent the arctic air across the plains into the north-central region and southward and eastward.

Gale force winds swept off the Great Lakes and dropped from one to five inches of snow over western New York. Highways were blocked, trees were toppled and there were numerous power failures.

At least two deaths and several injuries were attributed to the eastern storm. Wind gusts of 63 m.p.h. were recorded. Snow drifted to three feet in some areas.

Routes 5 and 20 in New York were closed in spots. Icy streets held traffic to a crawl. At least 30 schools were reported closed in Erie and Genesee counties in western New York.

Northern Midwest areas also had fresh snowfalls ranging from one to three inches. Temperatures dropped sharply in many Midwest areas which had reported near record high readings on Tuesday. There was a violent change in Chicago's sunny, mild springlike 71 on Tuesday to a chilly, windy 17 last night. Wind gusts of 60 m.p.h. were reported and fall state warnings were posted for Lake Michigan. Oklahoma City's plunge was from 70 to 16 degrees.

The freezing line extended from Western New York southward through central Tennessee. It was still below zero in parts of Montana, Wyoming and sections of the Dakotas. One of the lowest marks this morning was 18 degrees below zero at Harris, Mo.

Two workmen were killed in Detroit yesterday in accidents caused by the strong winds which lashed the motor city. One man was crushed to death when a 30-foot concrete block wall was toppled by a wind of 50 m.p.h. Another construction worker was killed when wind ripped a sheet of steel roofing from a fellow workman's hands and knocked him off a scaffold.

Snowfall this morning was reported in western Minnesota, northwest Wisconsin and lower Michigan, most of the far northwest and the western plateau region.

Big Freeze Is Still On

Okay, so it didn't get so chilly this morning after all. Just don't get any ideas about tomorrow. The Weather Bureau is still calling for that sub-freezing 23 in the morning. Freezing weather is forecast even along the coast. And as for the mountains—well, it'll likely drop to 15 or 20 there.

The cold front went through on schedule today, but there was so much warm air around the air didn't cool so fast. Result—a mild day tomorrow. However, the sun and the sun came the sun on its bright new year. Fair weather is expected through tomorrow. And after all that's the way it should be. November normally is the driest month of the year.

Conference Is Held Firemen Seeking Shorter Hours

A movement for shorter working hours for members of the Charlotte Fire Department was under way today. A conference of a firemen's committee was held this morning with Wallace Osborne, attorney, retained by firemen for development of this project.

No official word regarding the movement was forthcoming and Mr. Osborne said that a statement would be prepared later possibly tomorrow. Reports were that firemen are seeking council approval for an additional day off or institution of an eight-hour day.

Firemen now work 72 hours a week on the basis of 12 hours for six days. These are the longest hours of any workers of the municipal government and firemen are of the belief that this situation should be recognized by the council and some concessions made.

Most other municipal workers, with exception of a few other departments, work 40 hours a week, eight hours a day for five days. It was also pointed out that many other municipal workers receive numerous holidays but firemen do not enjoy this privilege.

This movement for shorter work schedules for firemen was initially brought to the council's attention by City Manager Henry A. Vancey at the Council center.

Evening Prayer

Lord Jesus Christ, Thou art Master, and we are Thy slaves. Thou art the light; we are the reflection. Use us that others may see Thy light in us; and by our actions, that we are Thy followers. For Thy name's sake. Amen

George Just Couldn't Sit Around And Loaf

By LOU PANOS
BALTIMORE (AP)—The doc said it was okay, so George Barnes is back in the hat-cleaning business. "Business is pretty good too, even if you don't make any allowances for the fact that George is 73 and ancient at Johns Hopkins Hospital in the last two years here."

Amputated his right leg above the knee because of congested blood vessels. "The leg let be amputated for the same reason in 1944."

Removed about 80 per cent of his stomach because of cancer. "I relieved him of an aneurysm, or balloon-like swelling of the aorta, the main blood vessel of the body."

"I don't see any reason why I should just sit around and collect relief checks and look at myself in the glass," George said today. "I feel just as good as I've ever felt."

He sat erect in his wheelchair, looking through the window at people passing by on Pennsylvania Avenue. Behind him, stacked high a
