Justice and the Fee System

A fee-paid constable this week carried a truck driver before a fee-paid justice of the prace, charqing the driver with running the driver with running his truck at the speed of 3 miles an hour, which exceeds the limit for a truck. The magistrate heard the charge, heard the plea of not guilty, heard the evidence and came to a decision. In the background were those conditions: If the man was found not guilty, there would be no fees for the constable and no fees for the mustistrate. If guilty, fees for both. The verdict was a conviction, and the penalty 35 and fees. The driver's employer spreaded the case to City court. disregarding the magisterial compromise offer that if the costs were paid, the fine would be remitted. In City court it was brought out to the judge's satisfaction that the charge was false. The cytidence was that the truck was equipped with minds it impossible for, the truck with minds it impossible for, the truck as a greater speed the life for trucks an A fer-paid constable this week

binnes!f.
But that, it seems to us, should not end the case by any means. Why should such an officer of the law be permitted to hold his commission? What recourse is there against a magisterial system that listens to but one side of the evidence? Suppose the Nergo truck driver had had no employer and no money for an appeal; who would have saved him from an injustice?

A Week Well Spent

After 39 years, a former resident of Raleigh has received a \$2.50 check from Uncle Sam for his seven days service in the Spanish-American War. Of this amount, only \$3.50 was for salary. The rest was interest.

This reteran: waited a long time for his pay check; nevertheless, the probability is that the week he spent in the army will turn out to be the most profitable week of his whole life. Under the terms of legislation passed by the House hast session, he would be entitled to wait to not a service of the production of the service of the s most profitable week of his whole life. Under the terms of rigidiation passed by the House last session, he would be entitled to swalk up to a Treasury window and say. "I fought in the 'Bpanish-Anterican War 30 years ago. You owe me \$60 a month from now on." The 'Benate didn't get around to this bill last term, but it will be coming up again and in the present generous state of the legislatorial mind it will be passed. In that event, rich men, poor men, beggar men and thieves will be entitled to draw \$50 a month from the Covernment If they served, no matter where or how or for what length of time, in the armed forces of the United States in its six months' war with Bpain. Many of three veterans with Bpain. Many of these veterans are drawing compensation even now for disabilities in no way connected with their war service.

Sweet Charity

I not sure that such a manager would earn his salary many times over. Anyhow, something certainly should be done about the present situation that permits one of the State's most stadium, that represents hundreds of thousands of dollars, to lie title week after week.

called Sons and Daughters of High-lander Rooters.

Of the original stalwarts who went to that they park, too few are left to be ef-fective and I am afraid that their ferce-may not have passed on to their chil-dren and grandchildren.

As one who watched the new team come to town and languith I would like to their from other original Mightander Rooters and see if we might not club-ingcluber to create some memorial for the only neighborhood professional ball team New York has ever known. There ought to be a labbet to mark the spot where Widt Connay played an Indifferent third base and Kdt Ebreffel Gought the un-niers, the opposing team and the ball in his role as shortalop.

An a matter of fact Medical Center now occupies the ground where Harry Wolters, Bert Daniels and Jesse Tanne-hill used to roam. Perhaps there is an idea in that. Given three commists on base, John Ganzel could hit the highest pop hy ever known in organized basebail. He couldn't have done better if they had allowed him to uper a spade mashle instead of a bat.

But we original Highlander fans were always faithful unto death. If we do organize, I think it will be found that most the members of the devoted band are actively at work in the promotion of
