#### A Instice Dissents

"Black, J. was the lone dissentient from three decisions handed down by the Supreme Court Monday. The Justice thought that the 52-year-old interpretation of the Fourteenth Amendment which places corporations under the protection guaranteed "persons" was all wrong and ought to be destroyed. For, he said, corporations obviously are not in fact persons.

that, the Justice is right,

— sofar as he is explicit. Cortions manifestly aren't in fact

And yet — We suspect this the Justice was not nearly so explicit as he might have been. The chief cur-rent argument for depriving cor-porations of legal protection under the Fourteenth Amendment runs to the effect that "human rights are superior to property rights." That is almost a credo with the New Deal, and Justice Black in his career in the Senate was one of its most vehement exponents. So it seems fair to believe that that was really what Justice Black was getting at in his

to believe that that was really what Justice Black was getting at in his decision. But ah! now; having got to that, let us see. Corporations are not strictly person, no. But neither are they disembodied abstractions. They are simply segregations of persons who have pooled their property, under limited liability, to achieve what none of them could achieve alone. Well, and the protection guaranteed under the Fourteenth Amendment is—what? Just this, that no person shall be deprived of his liberty or property without "diss process" of law! It says, quite specifically, that, that property is a right of persons — a "human right," and It is to be said, then, the because persons have chosen to pool their property, they ought to be stripped of this "human right," and made open game for expropriation without "due process of law?" Curaelves, they don't believe it. In Jav? Curaelves, they don't believe it. In Jav., we do be-

liere that property rights are a di-rect outgrowth and codification of human rights, and therefore cannot

The phrase "command performance" does not set well in a democracy. Indeed, I think that some social secretary in some admitistration should emulate Endly Post, and Issue a book or leaflet defining the rules of conduct which commoners should follow in their relations with the White Rouse.
