### A Statesman Proposes

turned to Arrice, must now mentally a wouldn't have any unemployment problem then. Take out the 1200.000 Negroes, and there will be a 500 for every white boy and every while giff.—Associated Fress.

every white aget."—Lescotated frees.

Nobody with the most elementary acquaintance with the facts of economics will need to be told, of course, that the hoary old proposal which Theodore The Man resurrects would not do the thing he claims. On the contrary, it would leave us with an incurably buside deconomy.

But it is curious to observe how the Man surpasses our own unfavorite Benator, Robert Rice Reprodés, when it comes to concecting for

write Sensior, Robert Riosa himse, when, if comes to concecting, for political purposes, alleged schemes for the solving of unemployment. Robert Rice, of course, only wanks to round up the allens among us and herd them back to the country of their origin, regardless of what, including starvation and shooting, may happen to them there. But The Man — The Man wanks to pick up 12000,000 citizens of those States, born here, bred here, and, like their, fathers for generations, knowing no other country than this, and drop them down, presumably, into, a tropical jungle, where they'd have exactly the same chance of surrival

#### A Fortunate Land

The Dutch, who had hoped for a male heir to the line of Orange, are nevertheless not too disappointed according to the dispatches, that Princess Juliana has borne a daugh-

ter instead.

They have no reason to be. For Molland, ruled by the old Queen Mother Emma and the reigning Queen Wilhelmina since 1901, has Queen Wilhelmina since 1901, has been one of the happlest of all countries in this century. Its position, indeed, is really amazing, Geographically, it is naturally a part of Germany. Moreover, it lies on the North Sea, with its great port of Rotterdam. And Germany has long yearned to have a great port on the North Sea. Further still, and in addition to being enormously rich at home, it owns, in the Dutch East-Endies, one of the tebest prizes in the Orlent. Yet, il

that not even fitter has ever talked acrously of grabbing it, that it man-aged to stay neutral in the World Wet, and that, without any consid-erable may; it has held on to its colonial rishes in a world of rober nations.

Internally, too, it is singularly well-off. The objects of the world lightly, and to this day it is, on the gold standard. The honds are quoted as high as the best in the world. With many great industrial cities, it has no unemployment problem. And it it has any communits or fascist if it has any communist or faccist elements, they are small and unim-

#### Characters in Reverse

That was a curious argument which took place at a regional conference on control of the control

rection."
Whereupon, up got Dr. Louise
Pearce, of the Rockefeller Institute
for Medical Research, no less, to de-nounce the notion of a compulsor-pre-marital examination. Said she

"This is not Russia, and the peo-ple cannot be ordered about even for their own good. Nor is it desirable that they should be."

that they should be."

That's a strange contention from a medical person — and a woman medical person it that. To be sure society has no business ordering people about "even for their own good."

But it certainly would seem to have the right to order them about for the good of the unborn. And it certainly would seem to have the right to lake draw and the them to have the right to lake draw and to have the right to lake draw and to have the sight. to take steps against having arrin-tolerable load of incompetents and criminals cast upon it to support. For once, a politician seems to be thinking straighter than a scientist.

### Danger Zono

A trouble zone in the relations of the United States and Jupan, growing constantly more strained in China, is the salmon fishing waters of Alaska. Title to these fishing grounds passed from Russia to this country when the service was purchased, but the Federal Government has never formally outlined its exact claims. Meantime, however, the salmon industry has grown so this the

# IS THERE A FOOD-TRUST?

WASHINOTON—Norman Coudin, as-acclate editor of Current History, has written a very significant plece for its February Issue called, "Food For The Trust Busiers."

According to this article, there is a sock-full of unexploded dynamits ticking around somewhere between the Federal Trade Com-

rederal Trade Commission, the Senate and the White House. It is a report on agricultural throoms and the containers of the containers of the trade Commission \$350,000. It is said to have been suppressed, or at least not printed and published, due to some sinister pressum, presumably by lobbrished of the "food trust." This is presumed because the report is alleged to show because the report is alleged to show because the report is alleged to show that there is a food trust powerful enough to fix not only the price which farmers receives for some eash products, but also the price which consumers pay-

But in reading Mr. Obusit's article carsfully, I do not see that the case is completely mad, three. There has undustriedly been a great corporate concentration, in the datry produces business. The large flour milling companies have gonery reader. The bathing business has largely gone over to chains. The packers long have controlled the bulk of the butchering business. But to pass from that to a conclusion of extentionate control over prices is not so easy. Prices have genou bu, but even that is not proof. All food prices have tend them the price. From where did they rise? From destructive depression lows. It is tue also, that profile in these industries have

also, that profits in these industries have

The significant figure in all these monopolists of Profit of Profit in the sleged monopolist in the price has charges. Everybody knows that the charges. Everybody knows that the character certaint is—is the public interest impaired? In the charge for the service to great? This

is the public interest Impaired? In the charge for that service to great? This article is completely allent on that point and that is the only point about which the public cares very much. The truth is that our distribution system, is terrible. The farmer gets too small a proportion of the commer's price. Waste and duplication in getting his product to the consumer's table costs too much—not in exteriorate profit, but in an inefficient system.

Maybe A Real or bread distribution in New York City. It trust Might showed as many as sixteen bakery wagone daily serving the bread committee of retail read of the bread of t

waste and duplication, but nobody ever did anything about it.

ber of them do requestr.

# Two Disagree On Blue Law Repeal Theme

One Sees It As Boon To Honest Folk Was Need Relaxation, The Other As Godless.

THE APPERMATIVE

" Sundays.

What is this world coming to, when, in a "land of liberty" ministers try to throttle the happiness and freedom of the people of this great city by trying to force them to attend church?

People who work hard six days a week, find only Sunday in which to re-lax, to enjoy complete freedom, their minds taken from that syretyday grind.

Is it sinful on Sundar to enjoy one's self in class, wholesome and exciting antertainment, something to relax the

The writer, having lived in cities from coast to coast, does not find that open Sunday hurts attendance at churches, and does not believe it sinful to go to a good show. Atlanta

Make Charlotte, not only a "Friendly City," but a "City of Life" on Sundaya instead of a "City of the Dread." Let those who wish to go to church go—but please, ministers, don't do away with the pleasure and relaxation thousands emjor on Sundaya.

Charlette.

#### THE NEGATIVE

we as a people find ourselves in op-pression from practically every stand-polint. And many are beginning to won-der why. I have come to the conclu-sion that our leaders are leading us away

too far from God's will concerning his people.

Take our Councilmen—they ought to know God's will concerning the laws before they vote. Maybe they do. But temember the story of Judas, Matthew ZXXIII, 1-5 and take warning before it is too late. Also remember that there is a God and To has a will concerning the laws that govern the people of this earth. Expecially the Sabbath law, which is at issue now?

O. S. ROUSE.

## Birthday

(Alianta Journal)

Among the matter spirits whose birth-days come at this turn of the year—
poets, statement, heroes, philanthroplits—three is one for whom 'no ministri
raptures swell' and over whom way
faces finnumerable have been made, but
who deserre nevertheless to stand with
the world's benefactors. We refer to
Quintan. Three centuries ago, this week,
'the Countess of Chinchon, whose husthe Countess of Chinchon, whose hus-band was viercey of Peru, was curred of an aching fewer by the bitter but biessed bark of a tree which her physician had obtained from the Indians of that country. When the countess returned to 6pain abe took some of the bark with her, and soon it was noted through-out Furope. The tree was fittingly named for her; chitchona; but the medicine was called after its Indian word, quina-quina, quinker.

# Visiting Around

we gest Use Full-Size Ferron in the Whole Cries (Rodanthe iten, Dave County Times) The Ladie Aid Society met Wednesday at the home of Mrs. Erroy Midgett. Members pressun were Mrs. Erroy Midgett, Mrs. De. B. Midgett, Mrs. Dev. Midgett, Mrs. Dev. Midgett, After the hundrest Maston refreshments were served by the hostess.
