To say that the President's recognition of such a plain fact would constitute endorsement of the prejudice is far more didulet than to say that his endorsement of Jim Farley's attement that American ideals ought to mean that every father or mother, recardless of color or creed or race, should be able to regard every newborn child as a possible President of the United States — to say that this means that he wants a Negro elected President.

The poor Charlotte Housing Authority. It's damned if it do, damned if it don't. See if it is not so. Wrote the Property Owners Co., Inc., in a letter published Bunday:

"The 35 per cent of our clittens in the lower Income brackets will thus not be financially shie to live in the properties the Housing Authority has under construction, as not over twenty per cent of the income of any renter should go to pay rent."

Using Force On A Federal Judge Could Be Risky

Judge Could Be Risky
Little Ed Rivers, Governor of Georgia,

It is likely that even Little Ed has a certain amount of discretion and so won't really attempt it. But just in case he has any doubts, he might look into the Federal Code before he moves. First, there is the army at Fort Benning to enforce the judge's decisions and to give him protection, if the judge deems it necessary. Secondy, the United Batters War Department can order the National Guardmen to hand over all clothing, food, and equipment — the property of the United States— and enforce it with the bayonet. And, under Title 32, Section 21. food, and equipment — the property of the United States — and enforce it with the bayonet. And, under Title 32, Sec-tion 81s, the National Guardsmen themay be mustered into the army, selves may be mustered into the kind, ordered to disperse or aid in the incar-ceration of Little Ed, under penalty of being dealt with as mutineers if they

No Snooping Wire-Tapping Order Has Good Logic Behind II

Attorney General Jackson has settled the wire-tapping uproar by issuing blanket orders to J. Edgar Hoover's FBI

not to use that method of gathering

It promises to hemper the FBI to some extent, since the evidence in several kid-gapling cases was admittedly gathered by lappling wires. Moreover, there is no evidence that Mr. Hoover's men had actually used tapping of wires for any but legitimate purposes. A guilty con-seience perhapa had a good deal to do with the concern of at least some of the accusers in the case. "The wirked," observed a not-unshreed man many rears ago, "fleeth when no man pur-routh."

Even so, the order is a wise one. Wire-tanning is ultimately of a niese with

Even so, the order is a wise one. Wiretapping is ultimately of a piece with

way for some high-handed and dictatorial Administration to caveadrop privileged communications between those oppose it, to punish secret re-trants, etc. in short for an OGPU

A silly fear? Perhaps. But it is better to lean over backward in such a situation than to be taken by surprise.
