enjoying the fruits of self-government. It was this missionary real, largely, that captured the spirit of Woodrow Wilson and inspired the concept of a democratic

assembly of nations.

Moreover it is this same zeal that helps give velocity to democracy. Without it, we become complacent, self-statisfied, devoted to maintaining such success as has been ours rather than add-

ing to it.
.That attitude has led to a static dem-

That attitude has led to a static democracy and a cooling of our seal for its preservation and extension. In another world, this process might have lasted indefinitely, for a hundred years or more. But in Hitler's world... When a predominant missionary doctrine alons down, other doctrines are certain to vie for its place. National Socialism has velocity, missionary zeal at least for the Germans. It has better the common than t

## OPM Asks More Speed

By Reymond Clappe

Wishington. — One other he was a company of the company of the majorith has been to appeal to the Army for synchry placement of order.

The War Depart-

Sei

ion by two circumstances.
One was that, as against \$5.500.000. ion by two circumstances. One was that, as against \$5,00,000, -000 piaced in contracts, there remained funds of \$1,000,000,000 not ret under contract. Of Lend-Lesse funds allocated to the Army, \$200,000,000 had been placed while \$2,000,000,000 was unplaced. O're officials discovered that a number of defense producers were beginning overder should return the producers beginning to the producers that the contract producers that year. They had begin taperns off in the year. They had heard big talk about her much was yet to be produced, but so far as they were concerned it was only talk, not order in hand. Onsequently O'M officials found many defense plants operating on one shift success surplace plants hesitant about more surplace plants hesitant about more out their third shirts. Consequently one of the plants hesitant about more appearance of their third shirts. Consequently for the plants he produces a precuring a continual plants are no point in training new working as the producers of the plants he produced as a popular to the plants a plants he produced as a popular to consequently received the plants of the plants

That attuation, plus his fact that the money was available, caused OPM offi-cials to urge that orders be loaded on heavily so that the weight of them would

heavily so that the weight of them would prod inditury.

If the charm were available, they would show that the programs scheduled went on and up over the next two years for most major items, but that the or-ders actually placed will reach produc-tion peaks about six months from now and perin to taper off thereafter. The effort is to bring the orders in hand up to the level of the scheduled programs as quickly as possible so that industry can plan with certainty on a longer-rance basile.

## SPECIAL CASES MUST

CONFORM TO POLICY
That it the general policy now going not effect. At the same time, many special situations have to be adjusted in the interest of the otter-sil program. For instance, the program for a certain line of viral goods seemed to OPM offerein secessive in view of the greatest program and was certain to shared raw material desperately needed for other defense work of more surgents.

program and was certain to shoch raw materials desperately needed for other defense work of mots sureiner.

After conferences between the Army and OPM. It was agreed that the contemplated orders in this case were tunnered to be the contemplated orders in this case were tunnered to be the contemplated orders and the contemplated orders are materials would be available for other use.

Again there recently came a franken tunn for a certain piece of equipment. What should be done? One suggestion was to commandeer machine tools. After a second book it was declined to defer some Nary work and thus obtain the necessary equipment for the rush order. Schedules are constantly being uperformed as the contemplate of the rush order. Schedules are constantly being uperformed to the contemplate of the contemplate o

## PLASTICS BEING SUBSTITUTED

PLASTICS BEING SUBSTITUTED
FOR ALUMINIM

shirtagers, as in siminium, are detring defense infutury to pecula resourcethiness. Bome startling substitutions of patients for siminium are under way. One official disclosed in a recent apeech that plastics have been subastituted for metal, in 54 knowler parts.
Some other purchasticutes at summurur remain military secrets.

The net of all this is that as the
defense program programse, the ingratury
and adaptability which are the special matrix of American industry are
coming rapidly into play. If we are not
by nature a military people, we are an
industrial people. We lacked the imagination at the start have comprised the
vaccious nature of the program. Mistakes at the start have taught is some
leasons. As the program of the
vertices.
