Finland's Peace

Despite Mr. Tanner's Hopes The Road To It is Bloody

If the war between Russia and Germany were completely one-sided, if either the Natis or the Sovieta had demonstrated clear and declaive superior, it would not matter greatly whether little Finiand remained a fighting ally of Adolf Hiller's. All available evidence, however, indicates that neither the Russians nor the Nazis are able to muster an overwhelming combination of forces; certainly not the Russians and after almost three months of frightful human and material sacrifices, the Germans

most three months of frightful human han material sacrifices, the Germans have yet to announce the capture of a single majoricity from their foes. It is a close fight, then, and for either of the opponents, every little bit of extra sacistance is of the greatest im-portance. LABOR WILL CLING TO WAR GAINS

TO WAR GAINS

The second development is the revolutionary change siready effected in the status of labor, which is expected to continue at least in part after the war. Under war preasure, isoth has given up the right to strike. In exchange imploymen are given up the right to fire and have granted guaranteed week the part of the

Trees, but it is all assessment than turn.

Zven casual labor, such as that on the docks, now has a weekly minimum wage. For years labor fought for this, with little progress. With the war, it came overmight, and labor won't surmember of the Government thinks it possible that this arrangement — no atrikes, no fitting — may be accepted by both sides after the war.

Others believe that labor won'd be content to continue on this basis but that employers, much as they diline strikes, will oppose the no-truing rules save if it means the return of the strike as a collective-barguine seapon. Much will depend upon whether England has a Labor Government after the war.

Roughly, the plan, which is still subfeel to modification, provides that wheatgrowing countries shall pool their surpluses in preparation for feeding fuprope siter the war. Officials and private economics who are interested believe that the United States and Great
Britain may have to go into a joint
program for management of numerous
basic commodities to avoid a revival
