WASHINGTON OF - U. S. food ocks are so large now that Sec-clary of Agriculture Orville L. reeman feels only a widespread onflict like World War II would equire all-out farm production.

Freeman told reporters Salur-ay there would be no need to change any of the country's present farm production policies in the event the Soviet-Cuban crisis should lead to a limited, Korean-type engagement.

A re-evaluation would be needed, he said, if nuclear war should come "because no one knows what such a war would do."

The nation now has adequate stocks of food and fiber to meet needs such as were involved in the Korean engagement, he said. Present food stocks are more than

the 10-year interval between 1950

part of the proposal as did the message made public. Tass reported Khrushchev's proposition in these words: We agree to withdraw from Cuba those weapons which the U.S. President considers to be offensive ones. 'We are ready to do this and announce in the United Nations this commit-ment, he added.

"Khrushchev also proposed

that the United Stales, on its part, taking into consideration the alarm and anxiety of the Soviet Union, would also with-draw their similar weapons from Turkey."

The Khrushchev messages—

the second one obtained from the news wires—were studied exhaustively by U. S. poricy makers and were the subject of discussions at a National Se-curity Council Executive Committee meeling at the White

The White House statement giving the Kennedy position on the continued rocket buildup was evidently decided on at that Several points in the Khrush-

U. S. officials as having a possible significance hearing on the real elements of conflict in the Cuban situation between United States and Russia. They were:
1. Khrushchev conceded the

50 per cent larger than when lie Korean War began in 1950.
The population increased from 151 million to 179 million during crisis. He described them as "weapons which the U.S. Presi dent considers to be offensive ones." This could ease the prob-lem of negotiation by indicating the Soviet government is will ing to deal with reality and drop the earlier pretense that only defensive weapons were present and that U. S. worry

ment did not slam the door on the proposal to trade elimina-tion of missile bases in Turkey for those in Cuba.

Britain, Italy and Turkey, among the 15 NATO allies, took U. S. missile bases. Turkey got 15 Jupiters having a range of 1,500 miles.

In the case of Britain, intermediate-range ballistic missile bases are already being disman-tled as the British switch over to a more modern type of air-

born nuclear rocket.

There has been falk from time to time in official quarters here that the Turkish bases were becoming obsolescent though they might still repre-sent a symbol of power and protection in Turkey itself.

In any case quite apart from the fact that they do not like even to talk privately about such a deal U. S. officials see complicated political problems in the way of working out an arrangement of the kind Khrush-chey proposed. chev proposed,

It would seem to require consideration by NATO allies and agreement—if they did agree—that the base in Turkey was no longer essential to NATO security in this age of Polaris sub-marine missiles and intercun-tinental rockets.

River Cabin Thievery Is Reported
